## PREMIUM ITALIAN AGRICULTURAL IMPLEMENTS

### VICTOR HD FLAIL MOWERS

Del Morino Victor heavy duty flail mowers are professional flail mowers suitable for front or rear tractor attachment. With Cat 2 TPL and **hydraulic side shift fitted as standard**, they are significantly heavier than the Levante range and popular with commercial farmers.

Victor flail mowers have heavy-duty hammers and a rear cover that, when mounted on the rear of the tractor, can be opened. The open cover is useful when cutting tall grass, allowing it to be ejected quickly without further shredding. The blades are useful when you want to cut very high grass and want it to be shredded several times – they function like a rake that holds the cut grass inside the machine until it has been thoroughly mulched.

### FEATURES

- > Reversible frame for front or rear mounting
- > 4-belt transmission with screw tensioner
- > Cat 2 hitch with hydraulic side shift (400mm displacement)
- > Cast iron gearbox with pass-through shaft and integrated free wheel
- > Rotor outer diameter 430mm mounted on 45mm diameter spherical roller radial bearings
- > Rear roller diameter 178mm mounted on side panels and adjustable in three positions
- > Rear cover can be opened when the mower is rear mounted for rapid grass ejection
- > Heavy-duty hammer blades
- > Blades mounted on the rear of the frame
- > Hydraulic side shift kit (standard)
- > 2 year factory warranty

*Del Morino Victor HD flail mowers are available in two models (see table).*
