# TRADE APPROVED WEIGHBRIDGE

A trade approved weighbridge will streamline your operation while meeting all Chain of Responsibility & trade legislation.

**TRADE APPROVED  
WEIGHBRIDGE**

**Eliminate the risk of overloads whilst maximising payloads.**

Anmar Scales provides an industry leading 10 year warranty for our new trade approved weighbridges through our after-care program (T&C's apply).

Weighbridges of any size from small axle weigh systems through to full road train multi-deck concrete or steel deck weigh bridges.

The Anmar Difference, as we design and manufacture locally here in Australia we can custom build any size weighbridge to suit any application with ease. **Call today to discuss the endless possibilities Anmar Scales can offer!**

# TRADE APPROVED BENEFITS

1. Confidence through your own NMI Legal-For-Trade weighbridge meeting Chain Of Responsibility & Legal Trading requirements
2. Anmar Scales promote, sell & install these weighbridges because they are designed & manufactured here in Australia to meet the harsh Australian conditions
3. Using a local business such as Anmar Scales means you can call anytime & know we are always near by for any support, at any stage, for all scheduled maintenance or breakdown situations
4. In the unlikely event that an issue ever arises with an Anmar Scales weighbridge, we work directly with our local manufacturer to rectify without hassle
5. Warranties & guarantees from both the manufacturer & Anmar Scales including the 10 year limited load cell & structural warranties (T&C's apply)
6. Complementary first 6-monthly service
7. Complementary Training for operators including ongoing maintenance of asset
8. The Anmar Scales Project Promise: There are 'no hidden extras' to be added after we commence your job - everything you need is included in this package!

**Our key point of difference can be summed up in just 2 words - LOCAL. QUALITY.**

**Anmar Scales Weighbridges** are designed & manufactured in Australia using superior grade Australian steel, meaning strength, durability & longevity - that is our promise.

*Remember, prices charged for foreign manufactured weighbridges are not reduced to match the reduced quality....*

A photograph showing a weighbridge under construction in an industrial setting. Several large stainless steel silos are visible on the left. A white van with 'ANMAR SCALES' branding is parked near the bridge. The bridge structure is made of galvanized steel and is supported by concrete foundations. The ground is wet, suggesting recent rain.

# WHAT IS INCLUDED IN YOUR WEIGHBRIDGE PACKAGE?

- ✓ The Anmar Scales weighbridge kit of your choice, locally manufactured in Victoria with all steel work fully galvanized
- ✓ Built in safety barriers on sides of weighbridge through our UB steel sides
- ✓ Freight of bridge sections & all components to site
- ✓ Crane hire for unloading & building weighbridge frames onsite by qualified technicians
- ✓ Genuine Rice Lake Stainless Steel Indicator (options taken and/or operational purpose will determine which model is used from basic weighing operation to fully programable systems such as our 'weigh in / weigh out' software packages)
- ✓ Stainless Steel Rice Lake 30t load cells with built in lightning protection
- ✓ Stainless steel load cell base plates, locating plates & load cell cups
- ✓ LED remote display/s, several options here from small to large which can also include traffic lights
- ✓ All load cell cabling across bridge & back to indicator (excluding 230V)
- ✓ All other associated parts such as conduits, junction boxes, hard set resin etc.
- ✓ All civil works including excavation of foundation pad with strip footings, supply & install of all reo mesh & bar along with all 32mPA concrete for the foundation, end abutments, 5m full concrete ramps & deck.  
**Note :** Anmar Scales are more than happy to provide full civil drawings to you for a local contractor to complete or we can look after the entire project from start to finish through our highly experienced civil team.
- ✓ Commissioning & verification with use of test truck, forklift & 20t of certified test masses, reports & associated National Measurement Institute (NMI) approval paperwork
- ✓ Our proposals include all labor, materials, travel & accommodation (if required) because of our Project Promise.... **'NO HIDDEN COSTS'**

# THE PROCESS

## FOR PURCHASING & INSTALLATION/CALIBRATION

### DISCUSS

Let's discuss your weighing requirements to suit one of our standard or fully custom solutions

### PROPOSAL

We will complete a comprehensive & all-inclusive proposal to suit your needs with 'NO HIDDEN COSTS'

### BUILD & CIVILS

Once signed off, your fixed-price weighbridge package will be locally manufactured while the civils begin. Within weeks, the base civils are poured & weighbridge frame is delivered to site & built.

### FINAL CIVILS & INSTALL

Next the deck is poured (in the case of a concrete deck bridge) & as soon as it is fully cured, the Anmar Scales team return to complete install of all electronics such as load cells, indicator & display/s.

### DONE

After testing, commissioning, calibrating & verifying by a licensed technician in accordance with the National Measurement Institute (NMI) testing procedure NITP6.1-6.4, your new weighbridge is ready for everyday use!

**NO HIDDEN  
OR EXTRA COSTS  
WITH THE ANMAR SCALES  
FIXED PRICE GUARANTEE**

## ABOUT ANMAR

We promise fast & on-time service, fixed prices and Aussie-made weighbridges through truck scales Victoria.

## OUR MISSION

Our vision is to see transparency, diversity & innovation in the weighing industry. Our fully licensed, qualified & OH&S compliant team is ready, now.

The decimation of the Australian manufacturing sector has taken a heavy toll on our nation & our people. Our goal is to supply, install, service & maintain Australian designed & manufactured weighbridges to help leading Australian businesses improve their productivity & profitability. We believe in & stand by our products because second-best is just not good enough. Our clients deserve the best; that is what Anmar deliver.

*On behalf of the Anmar team, thanks for allowing us the opportunity to be a part of your story!*

*Martyn Barlow*
