Notes: Standard and optional equipment may vary by country, please consult your Hitachi dealer for details. The machines shown on this brochure are so positioned for the sake of demonstrations. When leaving the machine, be sure to rest the bucket on the ground.

HYDRAULIC EXCAVATOR

Model Code : ZX17U-5A

Engine Rated Power : 10.6 kW (14.2 HP)

Operating Weight : Canopy 1 760 kg

Backhoe Bucket : ISO Heaped : 0.034 m³

Trustworthy and User-Friendly New Compact Excavators

ZAXIS Empower your *Vision*.

The new series of Hitachi compact excavators has evolved even further. We listen to customers' needs, provide solutions, and adopt fresh ideas into our new products. The outcome is reflected in our new excavators that are compact, productive and nimble. The round body is smart and its wide-opening covers provide direct access to service points for quick maintenance. The operator station is full of easy-to-use controls, an informative monitor, and a comfortable operator seat.

Notes: The machines shown on this brochure are so positioned for the sake of demonstrations. When leaving the machine, be sure to rest the bucket on the ground. The machine pictured here (facing pages) is equipped with optional piping and bucket with reinforced sides and bottom plates.

Comfort X High Performance

Operator Comfort and High Controllability

The work space is roomier than ever, despite being a mini excavator, while hydraulic pilot levers boost operating efficiency. The ZAXIS 17U is ready to get the job done on various job sites.

Hydraulic Pilot Control

Hydraulic pilot control levers provide light, smooth control of the front, blade, swing and travel. The levers are ergonomically arranged for easier and less tiring operation.

Functional Work Space

Switches, engine control levers and similar are functionally laid out, with unskilled operators in mind. The bright LCD monitor is easy to read at a glance.

Neutral Engine Start System

The engine cannot start unless the shut-off lever is in the lock position for safe operation.

Theft Deterrent System (Optional)

The electronic immobilizer requires the entry of a password via the each time the engine is started to prevent theft and vandalism.

Powerful Clean Engine

This powerful engine yields more production than the conventional (ZXTU-2).

ROPS/OPS (TOP Guard) 3-Pillar Canopy

The rugged 3-pillar canopy effectively protect the operator against tipping and are ruggedly designed in accordance with the ROPS* standard. All models are protected with an OPC** top guard against falling objects.

*Ball-Over Protective Structure
**Operator Protective Guard

Large Roof with Rainwater Groove

A large-sized overhead roof protects the operator from sunlight and rain. Its rainwater groove drains rainwater to the rear.

Adjustable Crawlers and Blade

Crawlers can be extended and retracted by control lever; retracted for truck transport and easy access to narrow job sites; and extended for surefooted excavation.

Wide Working Ranges

Notes: These specifications are for 3-pillar canopy, 0.93 m arm, 0.034 m³ bucket and 230 mm rubber shoes.

Easy Maintenance

Simplified Maintenance for Everyday Use

Wide-open covers give direct, quick access to main components for easy daily inspection and servicing, such as filter replacement.

Vertically Sliding Engine Cover

The upright engine cover, upgraded from the conventional model, slides vertically with less rearward projection for ease of maintenance in confined spaces.

Enlarged Refuel Port

The enlarged refuel port is adopted, like on the upper-classes, for quick refuelling.

Fuel filter

Water separator

Engine oil filter

Engine oil inlet

Coolant reserve tank

Air blowing for easy cleaning of dirt and soot

Radiator Capable of Easy Cleaning

The radiator and oil cooler are arranged side by side for easy cleaning. Ventilation ports on the radiator cover are enlarged for more efficient cooling.

Battery

Hydraulic oil tank

Fuel tank

Easy Access for Engine Maintenance

With the seat tilted up, the top of engine is exposed for easy maintenance.

Control valve

Hydraulic pump

Spare power supply (12 V)

2-Way Selector Valve

With the 2-way selector valve, the operator can effortlessly select the piping for the breaker or grapple.

Breaker ⇄ **Grapple**

One-touch-open radiator cover and large cooling duct with good cooling ability

Quality x Durability

High Durability Backed by Stringent Quality Control

High-Quality Hitachi Products

Hitachi has been globally acclaimed for its technological prowess and high-performance products ever since the launch of its first hydraulic excavator in 1949. Its Design Division has adopted the 3D-CAD system for ease of analysis and data crunching to churn out quality products and slash development lead times.

Newly developed products have been vigorously tested in multiple ways, such as extended-hours of durability and evaluation tests, at a vast Hitachi 4,270,000 m² test field under critical operating conditions – for instance, tropical or freezing weather conditions – before unveiling new products.

Durable Flat Bottom Bucket

This widely acclaimed flat bottom bucket, comes as a standard item to protect welds on the bucket bottom from wearing.

Wide wear plates are also welded to the bucket bottom protection to increase durability.

Durable Front Attachment

At the pin joints of the front, clearance fit gets tighter to reduce jolt and noise, and increase durability. Grease-retained FN bushings at pins allow for long 500-hour lubricating intervals. Main hoses at the swing post are covered with a hose protector. The boom cylinder is protected with a cylinder cover to increase durability.

Built on the foundation of superb technological capabilities, Hitachi Construction Machinery is committed to providing leading-edge solutions and services to contribute as a reliable partner to the business of customers worldwide.

Hitachi Environmental Vision 2050

Our Environmental Vision envisions a low-carbon society; a resource efficient society; a harmonized society with nature. To achieve such a sustainable society, we have established a set of long-term environmental targets called Hitachi Environmental Innovation 2050.

Reducing Environmental Impact by New ZAXIS

Hitachi makes a green way to cut carbon emissions for global warming prevention according to LCA*. New ZAXIS utilizes lots of technological advances, including the new ECO mode, and Isochronous Control. Hitachi has long been committed to recycling of components, such as aluminum parts in radiators and oil cooler. Resin parts are marked for recycling.
