

Damak 2 Pocket divider rounder	
 <p>The image shows a Damak 2 Pocket divider rounder machine. It is a large, industrial-grade stainless steel machine with a boxy, rectangular design. The machine is mounted on four casters for mobility. On the front panel, there is a control interface featuring a small digital display screen and several buttons. A yellow warning label is visible on the front. The top of the machine has a hopper for dough. A long, horizontal metal arm extends from the side of the machine, likely for dough output or adjustment. The machine is set against a plain white background.</p>	<p>PRODUCT DESCRIPTION</p> <ul style="list-style-type: none"> • Automatic weight adjustment. • The machine is controlled by PLC touchable screen. • Automatically stopping itself by fault warning system. • Weight adjustment between 30-130 gr. • Advisable for roll bread, small baguette, sandwich and hamburger breads. • It is manufactured with 2, 4 or 6 pistons. • Pinning machinery that is suitable for sandwich Rolls moulding can connect to 2 rows model. • Possibility of combining by automatic dough positioning machine in 4 and 6 rows models. • 3000- pieces of dough dividing rounding capacity in a hour.
