VISCOUNT PLASTICS AUSTRALIA MATERIALS HANDLING CRATES CATALOGUE

Materials Handling Solutions
for the real world

The diverse range of crates and totes are designed to suit all of your Materials Handling requirements. The Viscount range of crates includes folding crates, swingbar crates, bulk bins, pallet compatible crates (both for local and export use), Stakanesta and Nesting only crates.

A key object of Viscount Plastics Material Handling is working with customers to help them reduce waste and improve efficiencies in their supply chain.

Viscount Plastics Materials Handling does this by driving out costs of your supply chain using multi trip systems that utilise our range of Materials Handling crates, or designing a system specific to the needs of the customer.

With worldwide facilities producing innovative products and solutions, we are perfectly placed to support global players at a local level.

Please Note: Images featured in this catalogue are not to scale.

Dimensions are nominal (tolerances of up to +/- 1% should be anticipated).

For more detailed information on any of the products featured, specification sheet are available upon request.

Injection Moulded Materials: All products are manufactured from either polypropylene (temperature range of -0°C to +130°C) or high density polyethylene (temperature range -20°C to +100°C). The above temperature performance limits are dependent upon application, product design and top load requirements.

Rotationally Moulded Materials: All products manufactured by rotational moulding from high density polyethylene have a temperature range of -18°C to +65°C. The above temperature performance limits are dependent upon application, product design and top load requirements.

AUTOMOTIVE crates

Don't be fooled by inferior imports. Designed originally to meet the needs of the automotive industry, this family of strong and rugged containers are used for handling components in a wide range of heavy manufacturing and assembly line situations.

All products are pallet compatible and special reinforcing columns allow them to be stacked when full. The base is also strengthened to withstand the punishment so often metered out by conveying systems and a special design feature prevents both buckling and climbing over when crates back-up on a line. Smooth in-built hand grips make for easy lifting. This range is made from tough durable polypropylene and is UV resistant - this adds up to a long service life in tough industrial environments.

SOLUTIONS crates

Safe, reliable and smart handling is essential in the business of logistics. Handling is a critical part of the supply chain and the need for efficiencies in this area is a key driver to reducing costs and making real business savings.

Viscount has a wide range of container and crate solutions for all types of materials handling needs. The variety of sizes ensures that each different aspect of your business is considered and catered for.

From small systematic Nally MicroBins to the original and best No 10 crate, Viscount offers a range of crates that consider the needs of security, smart logistics, identification needs, strength and product integrity.

BAKERY crates

Bakery – The handling of large quantities of freshly baked breads, rolls and confections can be challenging. The solution is a lightweight plastic tray that can carry bulky loads, that can stack without damaging the contents and that lets the product packaging show through. Trays must also accommodate automated handling equipment and hand-truck delivery. And when empty, they must nest to minimise the amount of storage space required. The trays must have smooth surfaces, which are easy to clean with no rough edges that can tear packaging. They must be attractive enough to encourage purchases right out of the tray. The ideal source for such trays is Viscount Plastics. With many years of experience Viscount has supplied the bakery industry and has a range of rolls trays, bread trays and multi-level trays to meet your needs.

NALLYENVIRO™ crates

The Nallyenviro range is about giving the user choice. These products are made with recycled materials using the high design standards of the Nally range. These products are a great environmental alternative. They are often lower in price than virgin material crates and have the ability to be recycled again and again, just like all the Nally range.

MICROBINS

An integrated small parts storage system. Nally MicroBins offer optimum storage versatility and easy parts access. Developed with the assistance of leading edge technology, Nally MicroBins are made from tough, durable polypropylene, are light in weight yet strong enough to withstand the rough and tumble of everyday use in busy work environments. Wherever there is a need to store small parts or components for quick identification and easy retrieval the Nally MicroBins offer the answer.

NALLY UTILITY BINS

Nally utility bins offer a cost effective space saving solution for the storage and handling of a wide range of component parts. They are light in weight, yet strong enough to give a long service life in tough manufacturing, assembly line and engineering applications. Internal divider options give maximum storage flexibility and strong, integral handgrips make for easy handling. An easy to change labelling facility is incorporated and all Nally utility bins can be stacked or nested when empty to save valuable storage space.

MEAT & POULTRY crates

These industries demand cleanliness, efficiencies, strength and value. Viscount has been a key supplier to both the Meat and Poultry markets for over 30 years. With key market providers Viscount has developed products that are strategic in the supply chain. The product range is vast - from the paddock to consumer - Viscount has materials handling solution for the real world.

PRODUCE crates

Traditionally Viscount's range of crates to this industry has been known as produce crates.

Produce can also be classified as agriculture and/or horticulture and is an important market in the Australian supply chain.

Viscount services this industry with many types of crates including the returnable folding transit crates, swingbar style crates, Stakanesta crates and bulk handling bins through to seedling trays. (For information on Viscount's Bulk Handling range just ask for a Bulk Handling Catalogue.)

Whether it be picking mangos or displaying the product to consumers, Viscount has a diverse range of products that fall into this category.

We have a plastic crate system that will work with your produce, agricultural and horticultural needs.

RFC crates

This family of crates RFC (Returnable Folding Crates) has been created for ultimate shipping & storage. They allow businesses to drop the old cardboard habit & become sophisticated in their supply chain solutions.

Rigid when loaded & stacked, these crates quickly fold inwards when empty. This design sets a new standard for stacking strength in a reusable collapsible container.

Available in four different heights, these crates can be used for any type of product or material handling application. Each crate has the same footprint folded or loaded thereby conserving valuable storage space. These returnable totes are ergonomically designed for manual operations, easy to assemble & disassemble & work equally well in fully automated systems.

- Product Features:
- Ergonomically designed bevelled hand holds
 - Knock-down quick release latches
 - Rigid vertical sidewalls
 - Australian footprint
 - Branding & RFID facility
 - Smooth interior & dimpled exterior

ATTACHED LID CRATES

Based on the simple principle that out of sight is out of mind, this range of containers with attached lids can be fitted with tamper-deterrent security seals.

By keeping high risk or high value items hidden from view, theft and losses can be reduced whenever they are being stored, handled or transported.
