Product Information Sheet

Absorb's Rigid Bund Filter

AES BF – Absorb Rigid Bund Filter

Instead of pumping out and disposing of oil and water or fuel and water mixes, fit the AES Bund Filter to the bund outlet.

The bund filter captures hydrocarbons and particulates but allows clean water through. It reduces hydrocarbons to less than 5 mg per Litre, which means no rainbow film on the surface and it's disposable to storm water by most permits.

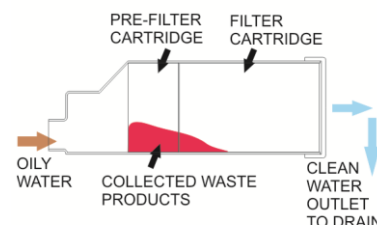

The filter can be made to fit any outlet to protect against storm water pollution. It can pay for itself after eliminating just one costly disposal. Replacement filters are easy to change.

IDEAL FOR:

- Permanent installation on your bund drain outlet.

TIPS:

- Designed for gravity drainage outlets only. Ask us before using with a pump or under pressure
- Replace cartridges after every 10L of absorbed hydrocarbons. When full, the filter blocks the bund outlet.

Rigid Bund Filter:

Part No.	Description
AES BF	Absorb Rigid Bund Filter Complete with filter Cartridges

Replacement Filters Cartridges:

Part No.	Description
AES BF C100	Absorb Bund Filter Pre-filter Replacement Cartridges 100mm x 150mm dia.
AES BF C500	Absorb Bund Filter Replacement Cartridges 500mm x 150mm dia.
