PRODUCT DESCRIPTION

Product Code: PC6210

The Sweetrich Apache is a rugged Powerchair that is suitable for indoor and outdoor use.

It offers an extremely smooth rear-wheel driving experience. The adjustable rear suspension, extra chunky pneumatic tyres at the rear and front, ensure that even rugged terrain can be navigated in comfort and safety.

The seat can be customised, by adjusting the seat width and the backrest angle as well as using a custom-moulded seat cushion if required. If required, an optional headrest can be fitted for additional comfort. Just like the seat, the swing-away footrests can easily be adjusted on the Sweetrich Apache.

The fully programmable controller will also allow for top and low speed adjustments as well as starting and stopping speeds.

Powered by a 350W and two 40AH lead-acid batteries the Apache can carry up to 120kg and travel up to 20km on a single charge.
