

ANMAR

SCALES

Bluetooth Weighing System

- Simple Installation
- Simple Operation
- Displays weight & total weight on your smart phone
- Perfect for owner operator non-trade applications.

Ideal for agricultural use. Turn your tractor or mini-loader into a weighing machine, giving you confidence in your measured loads.

As the sensor works by measuring the hydraulic pressure in the system, it can be used on virtually any hydraulic loading machine.

Typical accuracy between 1% & 2% of full machine lift capacity | 12Vdc | 3000psi
