

Annunciator (Display)

Standard 750x95x40mm, 80 column White
Mini 440x95x40mm, 40 column White

Key Specifications:

- 30 Addresses
- 999 Characters
- 13 Tones
- Repeated tone with time delay
- Day/Night volume adjustment
- 2 highlight message: Static and Flashing
- 3 colours message: Green, Red, Amber

The display is an intelligent stand-alone LED and TONE annunciator for use in a variety of applications for Hospitals, Clinics, Aged Care facilities and the industry. The feature of this model is that it can be ordered in single sided or double sided without any increase in physical size. At 40mm width, it is the slimmest double-sided display available today. The integrated TONE generator includes all Australian standard alert tones. All displays are tri-coloured with RED, GREEN, and AMBER on a black background. Communications uses a proprietary command message protocol that provides a simple & reliable visual and audible alert tone information.

The units are addressable or may be addressed with “broadcast” messages when required.
