## Vertical Baggers & Multihead weighers

Springless bucket

10-head Combination Weigher

Standard Pillow - Pack

Block Bottom

### The RPM VFFS Systems automatically:

- Elevate loose product to the weigher
- Produces a bag from a single roll of film
- Weighs & fills the exact weight of product
- Seals and date codes the finished bag
- Transports finished bags to a rotary packing station
- Check weighs and metal detects if required

# RPM VFFS SERIES

## Vertical Baggers & Multihead weighers

### Applications

Snack Foods  
Confectionery  
Fruit & Vegetables  
Pet Food  
Hardware

### Technical Specifications

Bag Sizes:	Maximum 280mm wide. Maximum 400mm long (single stroke).
Weight Range:	10-3000 grams.
Production Output:	Up to 70 bags per minute.
Bag Materials:	Polypropylene, Polyester, Laminates, etc.
Bag Gauges:	30-75 Micron depending on material.
Electric:	415V, 3 phase, 50Hz or to requirement.
Pneumatic:	7 bar.
Finish:	Stainless Steel.

### Features

Perfect combination of high speed and high accuracy.  
Digital sensors enhance the speed, accuracy and anti-jamming capabilities.  
Touch screen operation makes it easy to operate.  
Stainless steel (P65) water-proof, dust-proof design ensures optimal hygiene.  
Opening and closing speed of weigher buckets can be adjusted to avoid spillage and blockage.  
Management information systems to store production statistics.

### Advantages

Reduced labour costs.  
Maximises production volumes.  
Optimises product hygiene.  
Cost savings over pre-made bags.  
Reduces packaging inventory.  
Minimises production down-time.  
Allows flexibility for future market requirements.

## RPM VFFS SERIES

### Options:

- Gusset tucking to provide seals to make block bottom bags.
- Dimpled plate on all product contact surfaces.
- Check weigher.
- Metal Detector.
- Thermal transfer printer for product info, barcodes, etc.
- Rotary packing table.

### RPM Range Includes:

- Horizontal Flow Wrappers.
- Case Erectors and Case Liners.
- Case Packers.
- Bag and Case Closing Machines.
- Conveyor Systems and Product Fillers.
- Equipment can be added to enhance existing lines or can be supplied as a complete automatic system.
