

Talys

The perfect balance between practitioner and patient.

Simplicity. Ergonomics. Comfort.

Designed for practitioners seeking simplicity, comfort and efficiency, **Talys** reinvents the dental chair with a modern design and clean lines.

Its technical multi-layer memory foam upholstery ensures **uniform support** and **optimal patient comfort**, even during lengthy procedures.

12 o'clock position with direct vision of the oral cavity, Talys promotes fluid and symmetrical movements, limiting repetitive torsions and musculoskeletal disorders (MSD)

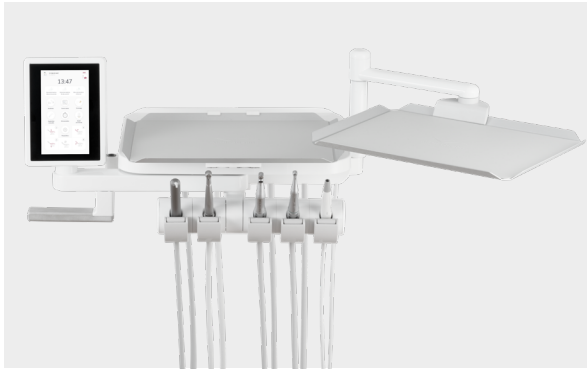

“ Working in a supine position improves gesture precision and reduces muscle fatigue.* ”

*Study «Acceptance of a lying position for dental treatment», IJOS Ergonomics, 2025.

Airel-Quetin dental units are Class IIa medical devices, Notified Body: SZUTEST CE 2195.

HANGING HOSES SYSTEM, ERGONOMICS AT YOUR FINGERTIPS

The Airel-Quetin hanging hoses system can support up to 6 instruments.

Each instrument is within easy reach, whatever the dentist's position, reducing unnecessary movements and facilitating every operative gesture.

- + « **Head-up** » instruments : l'inclinaison variable facilite leur préhension.
- + **Instrument mobility** : modular rotation and positioning for maximum ergonomics.
- + **Sliding support**: for precise and safe handling with every use.

FLEX SUCTION SUPPORT

The Talys integrates a suction support with two auto-select cannulas. It is maneuverable and compact, offers an ergonomic grip and natural orientation at the chair. Its ergonomic design limits forced movements and contributes to precise suction, perfectly integrated into hygiene protocols.

Upholstery

Multi-layer memory foam upholstery, with optional knee support to relax the patient's lumbar area. Available in 32 colors.

Headrest

The Talys ergonomic headrest integrates adjustable wrist rests, offering natural support for the forearms and optimal stability of gestures during precision procedures.

Calbénium® | IGN®

The IGN device combined with Calbénium product automatically disinfects the water in dental unit hydraulic circuits for patient-practitioner protection.
