Ripack Heat Gun - 3000

#60604

**Ultra Robust &  
Heavy Duty**

**High Safety  
Levels**

**Most Powerful  
Heat Gun**

**Excellent  
Ergonomics**

The Ripack Heat Gun 3000 is a robust, heavy-duty and flameless heat shrink gas gun used for shrinking plastic film to protect pallets or other such large objects in transit.

This heat shrink gun is robust and possesses the ability to shrink your products fast and effectively which makes our Ripack heat gun 3000 the most powerful product on the market.

Designed for efficiency and speed – it is the fastest shrink gun available. The quality of the short, powerful flame facilitates shrink wrapping and is suitable for ~150 pallets a day.

It can be used almost anywhere and is simple to operate. The unique cold nozzle system and the Securipack gas pressure control, in addition to the short and stiff flame, provide exact work with maximum safety.

The Ripack Heat Gun's patented cold nozzle technology allows the gun to remain cool despite being in use, avoiding possible burns or damage making it one of the safest guns on the market. The design of the gun prevents various air inlets from getting blocked, and also has an automatic switch off if excess pressure is detected.

Gateway Packaging's Ripack 3000 Heat Gun is the most versatile and powerful shrink gun in our range, suitable for all your packaging requirements. It is equipped with modular power and is suited for intensive use.

Manufacturing, construction, agri-food, and transportation/logistics are just a few of the industries that employ heat shrink guns to protect and package goods.

**Ergonomics** – The compact design of the gun is comfortable to hold, lightweight and includes a swivel hose connector allowing easy movement. **Robust design** – Manufactured to the highest standards, the Ripack 3000 heat gun will withstand long-term industrial use. **Safety** – The Ripack 3000 shrink gun provides the ultimate protection with its cold nozzle technology and securipack system. It will automatically detect the pressure in your gas bottle, and prevent overheating with a fail-safe regulator and automatic cut off.

The stainless steel heat diffuser is made in a way that it remains cold despite being used for long periods, eventually preventing any risks of burns through direct contact with the nozzle.

## Features

- Ultra heavy duty heat gun
- Robust lightweight aluminium body, with stainless steel nozzle
- Increased power, save 15% of your time compared to 2200 model
- One handed operation
- Use with LP Gas

## Specifications

<b>Adjustable Power</b>	45 to 76 KW
<b>Pressure</b>	1,5 to 3,5 bars
<b>Length / Height</b>	375mm / 262mm
<b>Weight</b>	1220g
<b>Sound Level</b>	< 85 dbA
<b>Energy Source</b>	Propane Gas (natural gas upon request)

## Kit Contents

- 1 Ripack 3000 Heat Gun
- Two piezo igniters, one of which is intended for emergency back-up purposes
- 8 metres propane type hose protected from abrasion, provided with mounted connectors
- 1 instruction manual
- 1 Securipack – combined fail-safe regulator
- 1 assembly wrench for gas connectors

See me in action!
