

Standard Colours

- This chart includes Cotene standard colours available ex stock. For a full range of colours available for tank applications please contact your nearest Cotene supplier.
- The minimum quantity is 25kg.
- Colour swatches and pricing are available upon request.

Special Colours

- If you require a specific colour that is not shown on this chart, we will match it to your needs.
- See our separate colour chart for the spectacular Stone and Special Effects range.
- Please contact us for pricing and minimum quantity details.

Compounded Colour Advantages

Controlled Pigment Addition:

- Physical properties maintained
- No pigment migration
- No pigment wipe-off
- Increased mould release efficiency

Controlled Colour:

- No colour variation from product to product
- Excellent Pigment Dispersion
- No unsightly agglomerates on finished product

UV Stability:

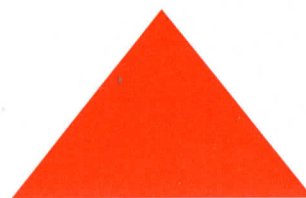

In the majority of cases UV stability will be improved by using compounded colours.
