EXCITE hearing systems
Get ready. Get excited.

HEAR Intelligence™

EXCITE

Hearing systems that
"wow" from the very beginning

Brilliant sound, exceptional design and great functions for smartphones and TV

The EXCITE hearing system's delicate, sophisticated designer housing is practically invisible when worn, and fits the shape of your ear comfortably. It's available in six stylish color combinations, but it's not just a pretty face - it's also very durable, with a special plasma coating to provide IP68 classification standard protection against dust and water. Make your choice : The EXCITE hearing system family is available with size 312 battery or size 13 rechargeable lithium-ion cell with up to 24 hours runtime¹.

Besides its appealing design, the EXCITE hearing system's true "wow" factors lie in the brilliant sound it offers from the first moment on, and in the practical functions it provides to help with everyday life. The hearing systems make it easy to make a phone call on a smartphone, listen to concerts or podcasts through streaming apps, or enjoy your favorite TV show. Bluetooth® turns these little helpers into wireless headphones - a safe, hands-free listening option for a variety of end-user devices, such as phones, tablets, or computers².

As with all HearIntelligence™ hearing systems by HANSATON, the EXCITE family offers precise speech, localization and optimization - binaural hearing intelligence - to make your hearing experience as individual and natural as possible.

¹ Lithium-ion-battery runtime:

Without streaming: 24 hours

AirStream technology (TV Connector/audiosignal): 16 hours

Bluetooth™ telephone and music streaming: 11 hours

² TV-Streaming requires TV connector connected to the TV set. Telephone streaming with Bluetooth® 4.2 wireless technology and most of the older Bluetooth® wireless technology enabled phones. The Bluetooth® word mark and logos are registered trademarks owned by the Bluetooth SIG, Inc.
