

These freezer racks fit various sizes of freezers, and they are compatible with freezer boxes provided by other manufacturers. They improve freezer space utilization and satisfy the storage requirements of biobanks.

SPECIFICATIONS

- Made of super thick corrosion resistant stainless steel
- Sliding design for easy access;
- Handle designed with a low temperature resistant plastic ring to prevent the handle and the outer of rack from freezing, protecting users
- Label slots for easy identification of samples
- The drawer with flanging edges design to avoid the risk of injury, with colored sample identification labels.
