MAKE A CHANGE

MHS

SCHNEIDETECHNIK GMBH

OUR SLICING AND PORTIONING MACHINES
SHOULD BE MORE THAN JUST MACHINES.
THEY SHOULD BECOME PART OF YOUR SUCCESS!

Founded: 1988

Company headquarters: Abstatt, Heilbronn

Products: Cutting machines for foodstuffs such as bread, meat, sausage, cheese and many more.

VISIT US ON THE INTERNET:
WWW.MHS-SCHNEIDETECHNIK.DE

MHS CUTTING MACHINES ARE SIMPLY SMART!

Better, easier, more economical – the cutting technology claims made by MHS are as short as they are concise. For over 30 years MHS-Schneidetechnik GmbH has been one of the most innovative international manufacturers of cutting technology for the food industry.

Founded in 1988 in Abstatt near Heilbronn, MHS initially specialised in bread slicing machinery. The demand quickly also came from the meat industry for equally high quality machinery for cutting meat, e.g. into cutlets.

With innovative ideas and top quality, MHS became one of the world's leading manufacturers of meat and bread cutting machines for use in trade and industry sectors.

MHS's closeness to its customers, along with its personal contact, enables the company to continuously accommodate new demands, needs and requests, and to be able to realise them quickly. In close collaboration with customers, innovations are thus implemented in the shortest possible time. MHS's objective is to remain the forerunner when it comes to innovations, quality, hygiene and service.

MHS slicing machines are regularly inspected for safety and hygiene by external test laboratories, and therefore fulfil the demanding European standards.

Through the combination of superb cutting quality, high throughput performance, individually adjustable slicing thicknesses and a comprehensive range of machines, MHS offers the ideal solution for every user.

See for yourself!

SMARTER CONSTRUCTION

- Quick and simple cleaning
- Service and maintenance friendly
- Smart in costs and upkeep

SMART OPERATION

- Self-explanatory/intuitive
- All important functions at a glance

SMART DESIGN

- Modern, yet functional
- Hygienic design

SMARTER SERVICE

- Service network for quick and competent help with low costs

PCE 65 TM

With the PCE 65 TM, we reacted to customer requests and developed a practical, space-saving table-based machine, which nonetheless offers the complete power of one of the large chop slicing machines.

PRODUCTIVITY:

- Up to 180 slices/minute
- Shorter cycles thanks to automatic return limiter
- Start device

SLICING RESULT:

- Precise result also for bone in products due to MHS micro-toothed blade
- Exact feed due to electro-mechanical feed

VERSATILITY:

- Strong drive for bone-in products
- Blades for additional applications such as bread or cheese available
- Removable output side for storage
- Mobile with pedestal

HANDLING:

- Simple operation via clear symbols
- Short training period
- Highest safety level
- Easy cleaning thanks to hygienic design and accessibility

PCE KM

The PCE range KM is easy to use, thanks to its clear use of symbols. The resulting shorter time spent training your employees, saves you money.

Learn more about our big seller and allow yourself to be convinced by the persuasive arguments!

PRODUCTIVITY:

- Up to 440 slices/minute
- Shorter cycles thanks to automatic return limiter
- Start device

SLICING RESULT:

- Precise result also for on the bone products due to MHS micro-toothed blade
- Exact feed due to less friction on structural surfaces
- Forward feed selectable, continuous or step by step
- Optimum hold due to adjustable gripper

VERSATILITY:

- Reinforced drive for beef products containing bones, e.g. T-bone steaks (-25 only)
- Extendable conveyor belt available in different length
- Shingling and separation of products in conjunction with a conveyor belt
- Stainless steel flaps
- Diversification of machines in product cross section and product length

HANDLING:

- Simple operation via clear symbols
- Short training period
- Highest safety level
- Machine on roller (-21)

IC 70/100

With the new generation of the IC series you are on the cutting edge of technology. Well thought out and designed for demanding day-to-day use, work steps have been reduced to a minimum. The integrated touch screen offers extraordinary convenience when it comes to operation and user guidance.

PRODUCTIVITY:

- Up to 720 slices/minute
- Shorter cycles thanks to automatic return limiter
- Automatic start up and searching
- Distribution on remaining slice
- Automatic start after closing flap
- Automatic input flap opener
- Pneumatic gripper

SLICING RESULT:

- High levels of accuracy even with products containing bones, thanks to MHS microtoothing
- Exact feed due to less friction on structural surfaces
- Forward feed selectable, continuous or step by step
- Optimum hold due to adjustable gripper

VERSATILITY:

- Single cut function with higher speed of blade to increase slice quality on low production rate
- Diversification of machines in product cross section and product length
- Integration into the production process by cutting into groups
- Extendable conveyor belt available in different length
- Shingling and separation of products in conjunction with a conveyor belt
- Stainless steel flaps
- Water nozzles for blade cleaning during the cut

HANDLING:

- Comfortable operation via integrated touch-display
- 100 programs storeable
- Highest safety level
- Even distribution of products by number
- Slicing software
- Software update and data backup via USB stick

ICC 25/36

With the ICC 25/36, we reacted to our customers' increasing needs. With throughput of up to 4000 kg per hour, you are on the fast lane. But we didn't compromise on slicing quality. The advantage lies in the continuous production flow, as unlike with traditional machines, there are no waiting times caused by having to retract the gripper or open and close the flap.

PRODUCTIVITY:

- Up to 500 or 1000 slices/minute (single or double blade operation)
- Easily integrated into production line
- Shorter cycles thanks to continuous feeding in of products
- Start-up system

SLICING RESULT:

- High levels of accuracy even with products containing bones, thanks to MHS microtoothing
- Exact feed through servo-driven feed belt
- Forward feed selectable, continuous or step by step
- Optimized hold of the product through MHS-toothed feeding belt and the product-adapting hold-down belts

VERSATILITY:

- Strong drive for bone-in products
- Product recognition enables to divide the product into different sections
- Single cut function with increased blade speed improves slicing quality at lower production rates
- Extendable conveyor belt available in different length
- Diversification of machines in product width

HANDLING:

- Comfortable operation via integrated touch-display
- 100 programs storeable
- Adjustable speed from 60 slices/minute
- Easy removal of all parts relevant for cleaning
- Complete closed and encapsulated housing
- Software update and data backup via USB stick

ICC 28

The ICC 28 is MHS's high performance slicing machine. The main absolute benefit lies in the continuous production flow, which is additionally supported by a gripper. This allows a portioning of the products. With the continuous loading, an hourly rate of up to 4 tons is possible. Among the standard products, MHS's innovative continuous slicers redefine economic efficiency and productivity.

PRODUCTIVITY:

- Up to 600 slices/minute
- Easily integrated into production line
- Shorter cycles thanks to continuous feeding in of products
- Start-up system
- Pneumatic gripper and ejector for remaining slice

SLICING RESULT:

- Optimized hold of the product through MHS-toothed feeding belt and the product-adapting hold-down belts
- High levels of accuracy even with products containing bones, thanks to MHS microtoothing
- Exact feed through servo-driven feed belt
- Forward feed selectable, continuous or step by step

VERSATILITY:

- Single cut function with increased blade speed improves slicing quality at lower production rates
- Optimal product feeding thanks to adjustable product spacing by use of two feeding belts
- Product recognition enables to divide the product into different sections
- Strong drive for bone-in products
- Movable conveyor belt available in different length

HANDLING:

- Comfortable operation via integrated Touch-display
- 100 programs storeable
- Shingling and separation the product
- Slicing software
- Even distribution of products by number
- Adjustable speed from 20 slices/minute
- Easy cleaning thanks to hygienic conditions and accessibility
- Complete closed and encapsulated housing
- Software update and data backup via USB stick

COMPACTSLICER

The Compactslicer is characterised by its compact design. You get a powerful, versatile machine with small footprint. With the Compactslicer you can cut sausages, bacon, cheese and meat.

With a motor for each, the blade and the blade head, the cutting ratio can be adapted for each product individually.

The touchscreen allows fast operation without extensive training of the operators.

PRODUCTIVITY:

- Up to 400 slices/minute
- Minimum end piece
- Easy and fast cleaning
- Shorter cycles thanks to automatic return limiter
- Automatic ejecting of remaining piece thanks to pneumatic gripper
- Automatic flap opening

SLICING RESULT:

- Precise result due to adjustable cutting ratio
- Automatic adjustable side limit stop and cutting frame for optimum slice position
- Exact feed through servo-driven feed
- Durable slicing system for best cutting results even at high speeds

VERSATILITY:

- Almost all products could be sliced without conversion via adjustable cutting ratio
- Numerous functions such as shingles, endless shingles, stacking (up to 50 mm), staggered stacking
- Wide infeed cross section of 300 x 150 mm
- Extended execution on request

HANDLING:

- Intuitive, easy-to-understand operation with program assistant via touch display
- 100 programs storeable
- Cutting frame and gripper removable and exchangeable without tools
- Highest safety level
- Software update and data backup via USB stick
- Minimal space requirement
- Tool car

① AUTOGRIPPER

② FLAP OPENER

③ WATER CLEANING

④ CONVEYOR BELT

⑤

MHS ACCESSORIES

The numerous accessories open up further advantages for high-yield production.

① AUTOGRIPPER WITH EJECTOR

The product is automatically gripped and the remaining slice is ejected.

② FLAP OPENER

Together with the autogripper, the work steps are reduced to a minimum. The flap opens automatically after the cutting process.

③ WATER CLEANING

Blade cleaning during cutting through water nozzles - especially for fish products.

④ CONVEYOR BELT

The height-adjustable conveyor belt enables grouping and portioning of the sliced product. The conveyor belt is available in different lengths.

⑤ HUGE BLADE SELECTION

For cutting fresh, boneless as well as bone-in and frozen up to - 4 ° C meat products into even slices. Likewise cooked products, sausage and cheese. Double knife e.g. for cutting butterfly steaks.

⑥ AUTOMATIC FLAP START

The machine starts automatically after the loading flap is closed.

SMARTER SERVICE

MHS machines fulfill the highest of customer requirements. Therefore the machine concepts are designed for absolute production safety, reliability and durability.

With a comprehensive network of service partners we can ensure consulting and support of our customers worldwide. Each service partner guarantees a fast repair and spare parts service with service mechanics specially trained on MHS machines.

In order to guarantee trouble-free use from the very beginning, the operators are trained and instructed on site.

If you have any questions or suggestions please contact MHS or your representative right away. However, should anything go wrong, please contact our service on:
