Heavy loads – easily moved  
Stage and theatre castors

# Heavy loads – easily moved

## Stage and theatre castors

Sets, stages, platforms and audience seating have to be assembled and moved accurately into position.

If you are looking for a reliable way of moving audience seating or need to move stage equipment easily and silently during a performance, then TENTE castors are the perfect choice for you.

Our castors have star quality. They are robust, durable and move easily across many different floor surfaces, both indoors and outdoors.

Simply tell us what you require and we will be delighted to help you find the ideal castor for the job.

### Robust

The use of high quality materials and the top-grade blue passivated surface finish ensure a particularly long service life.

### Tough

The solid construction allows the 3470 range of industrial castors to move loads of up to 400 kg per castor.

The load capacities of all our castors are tested dynamically in accordance with EN 12532.

TENTE theatre plates can carry loads of up to 900 kg, depending on the model.

### Smooth and quiet

The wheels are made of high-quality materials and equipped with precision ball bearings. We offer both convex and flat treads, which guarantees smooth and quiet movement.

## Series 3470

This range of castors has been specially developed as standard for use in theatre and set construction.

With a range of different wheels to choose from, you will be able to find the ideal castor for every floor surface. Various tread materials are available for selection.

- wheels are equipped with precision ball bearings or roller bearings
- they have low roll and swivel resistance
- particularly quiet movement
- available with convex or flat treads

convex tread

flat tread

This means that all the requirements for both indoor and outdoor use are well and truly covered.

### Series 3470

Housing made of pressed steel, blue passivated double ball bearing swivel head, dustguard, wheel axle with nut

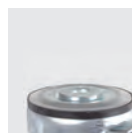

### Available as:

- 3470 Swivel castor
- 3477 Swivel castor with total lock
- 3478 Fixed castor

### Type of mounting:

Plates  
P62 and P63

Bolt hole  
P30

### Wheels:

UFR Wheel centre: Polyamide, black  
Tread: elastic-tyre, blue, non-marking, roller bearing

UFP Wheel centre: Polyamide, black  
Tread: elastic-tyre, blue, non-marking, precision ball bearing

ITP Wheel centre: Aluminium  
Tread: Polyurethane, precision ball bearing

Wheel sizes:  
100 mm to 200 mm Ø

Load capacity:  
Up to 400 kg per castor, depending on the model

# Theatre plates

## Series S-3470

TENTE theatre plates are particularly suited to transporting heavy stage equipment. The high load capacity of each individual castor is multiplied here.

The arrangement and design of the castors make it possible to manoeuvre heavy loads with ease, even in tight spaces.

The theatre plates are robust and durable. They can run on many different types of flooring and fulfil all mobility requirements.

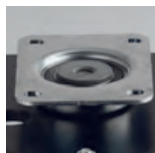

**Available as:**  
Swivel castor

**Wheels:**  
Various wheel models and sizes are available on request.

**Load capacity:**  
Depends on the model

**Series 3470**  
Housing made of pressed steel, double ball bearing swivel head, wheel axle with nut

**Mounting:**  
Plate P63

### Various wheels:

#### UAP

Wheel centre: Polyamide, white  
Tread: Polyurethane, purple, precision ball bearing  
Wheel sizes: 125 mm – 200 mm Ø  
Load capacities: 300 kg – 500 kg

#### UFP

Wheel centre: Polyamide, grey  
Tread: elastic-tyre, grey, non-marking, with threadguards, precision ball bearing  
Wheel sizes: 100 mm – 200 mm Ø  
Load capacities: 160 kg – 400 kg

#### ITP

Wheel centre: Aluminium  
Tread: Polyurethane, casted, precision ball bearing  
Wheel sizes: 100 mm – 250 mm Ø  
Load capacities: 300 kg – 1000 kg
