

Eye & ENT Stretcher | VSM-10V

Why Buy?

Precision, touch button positioning

Developed in direct consultation with specialists in eye, ENT, plastics, and dental care, the Eye & ENT Stretcher delivers advanced control in a slim, hygienic design. Its breakthrough headrest offers clear, unobstructed access to the patient's head and face – essential for precision procedures. Intuitive controls allow the surgeon and support team to smoothly and safely adjust the headrest, chair height and patient position during both procedures and transport.

- **Infinitely adjustable headrest** with tilt and height functionality
- **One-touch, electronic control** for precise positioning and minute adjustments
- **Reversible cushioned headrest** with flat or scalloped shape for tailored patient positioning

There are range of special [accessories](#) available including [wrist support](#), [pillow support](#), [oxy delivery socket](#) and [arm board](#).

Application

Ideal for Eye, ENT, plastics and dental care.

Key Benefits

- **Greater throughput:** Patients can remain in the same chair for admission, procedure and recovery, reducing risk and enhancing efficiency.
- **Leading weight capacity:** Modsel stretcher chairs are built with a super strong subframe that can hold and lift a class-leading 400kg/880lb.
- **Supercharged:** The long-life, cordless, fast-charge battery system keeps things moving all day (and night).
- **Clean and hygienic:** The smooth, gap-free platform makes cleaning easy and prevents fluid ingress to meet the highest infection control standards.

Eye & ENT Stretcher | VSM-10V

Effortless control

Clearly marked headrest buttons allow for precise and supportive positioning of the patients head with ease.

Ultra-low height

Very safe and easy for patients to get on and off.

The 460mm/18.1" low platform height of this table takes away the requirement to use step stools or unnecessary heavy lifting. Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.

Excellent high height

Preserve your back and raise a patient up to your best working height.

Lifting the platform height up to 860mm/33.9" (plus the mattress pad thickness), helps you to examine and treat your patient without having to stoop over, ensuring easy access and less stress. The backrest travels from 0 to 85 degrees with emergency CPR quick release.

Head and foot tilt

A generous 15 degrees top tilt both directions.

Position a patient how you need them or quickly lower their head down (and feet up) in an emergency.

Pop-up push handles

Patented fold-away handles adjust for flat or seated without backrest interference.

Reversible head cushion

Scalloped one side and flat the other for extra flexibility

Colour choices

Identify your product with Magenta, Blue (standard supply) or Red highlights.

Add colour to your environment or use to separate products between departments or models.
