

CON-SPACE Communications

CSI-1000 General Industry Kit

The **CON-SPACE General Industry Kit** is a one-on-one communication system configured specifically to help contractors work with greater efficiency and safety during operations in Hazardous Areas, especially where respirators or breathing equipment must be worn. The Kit can be expanded for one additional user adding the additional entrant kit as shown below.

CON-SPACE saw the difficulties contractors faced working in tanks, towers, reactors, vessels and bridges for sand blasting, hydro blasting, doing inspections, welding or general maintenance. In these work areas, many of which are Confined Spaces, good communication is essential for completing the work safely and on time.

Equipment is light-weight, portable and extremely rugged. The Hardline Systems are Intrinsically Safe Approved and allow full duplex, hands-free communication between all users for up to 1500 feet.
