35.8mm / 1.41"

Introduction

The EUA1200 is an UVC-compatible USB camera, which can be implemented directly without using a driver.

You can use the **EFCap** program to test camera image.
Download EFCap: https://www2.everfocus.com.tw/app/uploads/EfCap.7z

If EFCap is incompatible with your system, you can download **AMCap** from website, which is a free video capture software for Windows system.

Note: To avoid video flicker, switch the camera frequency to 50Hz or 60Hz according to the region of your country.

❶ Lock Ring

❷ Lens

By default, the camera focus has been fine-tuned to the optimal state. If you still want to adjust camera focus:

1. Loosen the **Lock Ring** by turning it counterclockwise.
2. Turn the **Lens** to adjust camera focus.
3. Tighten the **Lock Ring** by turning it clockwise.

Features
