# Microchips & Scanners

Microchips & Scanners

Cybortra Mini Microchip

Cybortra Standard Microchip

## Cybortra Microchips

**PACK OF 20**

The Cybortra Microchip is a one-piece unit that fits easily into the hand and is ergonomically designed for comfortable and efficient use.

The red sleeve must be removed before the applicator stylet is depressed. This avoids inadvertent microchip ejection and also makes identification of used microchip applicators easy, especially when microchipping a litter of pups.

- *ISO FDX-B type microchip (required by law for implanting in Australia)*
- *Manufactured to specifications ISO 11784 and ISO 11785*
- *Scans at the frequency of 134.2khz*
- *Each chip has a unique 15-digit microchip number*
- *Approved for Australia-wide implanting*
- *Microchip is encapsulated in an inert bioglass*
- *Size of Minichip – diameter 1.4mm, length 8mm*
- *Size of Standard chip – diameter 2.12mm, length 12mm*
- *Individual sterile packaging*
- *6 duplicate barcodes included for each microchip*

### IMPORTANT REGISTRATION INFORMATION

*For implanters outside NSW, by law, microchip registration (paper or online) needs to be purchased at the same time.*

*We use Central Animal Records (CAR) or Australasian Animal Register (AAR) – the most used and well-known animal registries in Australia.*

## New South Wales

Microchips only — no registration required

DESCRIPTION	CODE

## Portable ISO Microchip Scanner

### CODE

GVPDW-PT160

Used for scanning ISO FDX-B type Microchips (RFID tags) that use the 134.2kHz frequency. It has an OLED display and sealed-in rechargeable battery. Stable, safe and reliable performance.

Specifications:

- Size: 16 x 9 x 4 cm
- Frequency: 134.2kHz
- Reading standard: ISO11784/5 FDX-B/ID64
- Charging method: USB
- Charging voltage: 5V
- Charging time: 4-5 hours Operation
- temperature: -15°C to 45°C
- Certification: CE ROHS
- Good for >5,000 scans after full charge

All prices exclude GST, freight charges may apply, see website for Terms & Conditions
