

New Battery Insulating Pull Tabs

These battery insulators are designed to protect batteries and circuitry during shipping and storage prior to use.

These new insulating pull tabs are installed in a product along with the batteries to act as an insulator from energizing the device prior to use. Simply pull the tab out from under the battery contact to activate the product. Lettering and arrows on the pull tabs make for simplified removal.

Manufactured from thin, flexible polyester, these pull tabs can be removed from a battery compartment even if the compartment is closed.

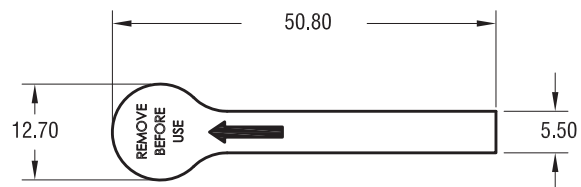

* These items are newly released. Please check stock levels before ordering.

QuickSpecs

Colour	Clear or white (rolls)
Packaging	100 / bag. Also available in rolls (of 1000), supplied with micro-perf separation between insulators.
Tab Size	Part # K119: 5.5mm - Ideal for button cell thru AAA Cells. Part # K121: 12.7mm - Ideal for AA cell and larger.
Material	Clear polyester or mineral reinforced polypropylene (rolls).

Part # K119

Also available in rolls (use part # K111)

Part # K121

Also available in rolls (use part # K117)
