

Alsto DP2000 DISC PULVERISER

The **Alsto** DP2000 Disc Pulveriser is a simple, robust machine designed for fine grinding of a large variety of sample and ore types. The unit comprises one fixed and one rotating 200mm grinding plate turning on a horizontal axis. Internal surfaces of the grinding chamber are smooth and easily cleaned, with the sample drawer located at the bottom of the chamber.

The DP2000 features include:

- A simple screw adjustment to control product sizing via plate gap setting.
- Powerful 4kW, 3 phase drive motor
- Supplied as standard on a base plate suitable for bench/workstation mounting.
- Durable chilled cast iron disc plates for long life

Technical data:

Max feed size:	12mm
Product size:	75 micron and up, dependent on disc gap setting
Throughput:	15-150 kg/h depending on disc gap setting
Shaft speed:	1150 rpm
Motor:	4 kW 3 phase
