

# FABY INFINITY

# FABY INFINITY

Faby Infinity is a multifunction slush machine that can produce and dispense products such as slush, cream, yogurt, sherbets and alcohol-based products. Thanks to its tank's capacity, Faby Infinity presents itself as the ideal solution for those who have a high daily consumption of product. The exclusive project which exploits a very high-performance cooling system allows to obtain excellent performances even in extreme conditions, significantly reducing waiting time. The innovative design of Faby Infinity differentiates it from the other machines already on the market, proposing itself as a unique model of its kind.

- Electromechanical system which makes the machine reliable at any temperature
- Best air circulation in the category thanks to innovative design
- Double LED lighting system in the back of the tank to highlight the product and illuminate the cover
- Big customizable area on the front panel
- Anti-dust easily manually removable filter
- Opportunity to customize the front cover display photo
- Opportunity to fill the tanks quickly thanks to the absence of electric wires in the cover
- Tap cleaned at every dispensing with the new self-cleaning system
- Protection of the switches through the side door
- Night-mode operation which allows storage of the product with very low energy consumption
- Easy to use, clean and maintain
- Opportunity for aesthetic and technical customization
- The machine has various approvals, among which: CEE, NSF, UL, CSA, GHOST, SABER
