Why Buy

Due to so many wide and varied departmental requirements for specific oxy bottle sizes and positioning, we have developed a range of options. Larger bottles can be laid horizontally to ensure they are kept out of the way and smaller bottles are commonly mounted vertically. Some prefer 'fixed', non-moving positions and others require 'swinging' options that allow the bottles to be moved aside if they become an obstruction during transport. There is also the option to support bottles vertically either above or below the patient surface.
