

The Eagle Tyre Debeader efficiently removes both beads from car or truck tyres simultaneously. Extracting the bead wire before shredding refines the final product and reduces wear on shredder components.

Effortlessly removing beads, it complements our tyre recycling equipment, making it ideal for tyre shredding facilities in Australia.

## Features

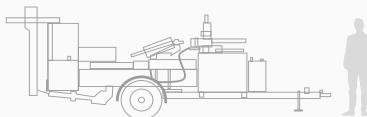

- Preventing wear and tear on tyre shredders
- Produces recyclable steel bead wire
- Stationary or portable models available
- Clamp cylinder to allow removal of broken beads
- Hydraulic tyre lift allows for easy operation without manual lifting for safety

## Options

- Power options of 60 HP Kubota Turbo Diesel motor or 60 HP Electric
- Stationary or Mobile model variation
- car tyre die plates
