

Silicon Pendant

Two Button-Gen 2

MED-NC2B/SIAT1 (Tip/Ring-Call)

MED-NC2B/SIAT3 (Tip/Sleeve-Call)

Indigo Care's Generation 2 silicon pendant is an improved version with added features. This pendant has a better aesthetic appeal and a softer CALL button. The new design has wider grooves around the button and edges for easy cleaning. The large green fluorescent CALL button is soft, easy to press and glows in the dark. It has a Braille imprint for visually impaired patients/residents. The yellow light button allows the resident to switch a light on or off via the pendant. The pendant is waterproof, dustproof and shockproof with IP67 rated. The silicon rubber has anti-fungal and anti-bacteria properties for infection control (tested for E-Coli ATCC8739). The pendant is backward compatible with known nurse call systems in the industry.
