

# PATIENT LIFTS WITH LINEA CASTORS

 40 - 150 kg

 50 - 177 mm

 50 - 150 mm

Would you like to relieve the nursing staff when transporting people in need of care and protect their valuable workforce? With our Linea product family, your lift is given the greatest possible mobility, ergonomics and safety!

## Low overall height

Procedures also possible under low beds.

## Sturdy construction

Payloads up to 300 kg possible.

**Optimized maneuverability** Easy maneuvering possible thanks to double rollers (differential effect).

## Quick assembly

Easy and quick to mount with a screw via back hole fastening.

## Standard-compliant design

Complies with the requirements and specifications of ISO EN 10535:2006, lifters for the transport of disabled people and ISO EN 12530, Ap paraterollen standard.

**TENTE**

BETTER MOBILITY. BETTER LIFE.

# SPECIAL FEATURES

## BE INSPIRED

### Safety function

By pressing a lever, the roller is released and can move. If the lever is released with a cable pull, the roller automatically becomes fixed.

### Ergonomic pedal lever

With our kick pedal you can simply kick against the lever from above and thus release the detection, even with safety shoes!

### Washability

Our high-quality plastic and optional stainless steel parts ensure long-term stability in use with water and commercially available cleaning agents.

### Combined hold-hold system

Directional determination and total determination can be operated separately in one roll.

### Individual branding

Printable with logos to underline your own brand – pictograms can facilitate assignment and thus increase productivity.

### Color adjustment

Colour design, adapted to individual wishes or for corporate design specifications, possible.
