

CBS P-Tech™ Conveyor Belt Cleaners

CBS P-Tech™ Conveyor Belt Cleaners effectively remove granule and adhesive material from conveyor belts at discharge points.

What they do:

- Prevent the accumulation of material on conveyor belt return rollers and structures
- CBS P-Tech™ Conveyor Belt Cleaners have the added benefit of helping to ensure a clean and safe working environment

How they can be used:

- CBS P-Tech™ Conveyor Belt Cleaners are designed for use on single directional conveyor belts
- CBS P-Tech™ Conveyor Belt Cleaners can be used both individually or in conjunction with a CBS primary cleaner as part of a full cleaning system

Why they're superior:

- When used in conjunction with a CBS primary cleaner, the CBS P-Tech™ Conveyor Belt Cleaner produces exceptional results
- CBS P-Tech™ Conveyor Belt Cleaners are completely stainless steel, meaning increased longevity and less maintenance
- CBS P-Tech™ Conveyor Belt Cleaners include impact-resistant tungsten carbide cleaner tips, which provides the added benefits of:
 - maximum abrasion resistance
 - maximum resistance to corrosion in environments high in acid or salt
 - the minimisation of cleaner tip failure due to contact with corrosive or erosive material
 - an increased service life
- Complete Belting Solutions Pty Ltd is 100% Australian owned and operated
