## THE BIO-DISINFECTION PROCESS

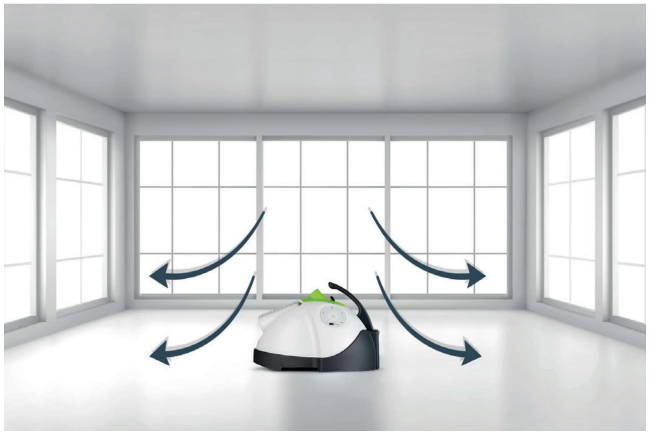

### 1. INSTALLATION
Placement of the Nocospray system in the room to be treated.

### 2. SPRAYING
Spraying of the product in the form of a dry mist in the room to be treated, evenly over all accessible surfaces.

### 3. CONTACT TIME
The dry mist remains suspended in the air and eliminates all micro-organisms (viruses, bacteria, spores, yeasts, etc.) present on the accessible surfaces of the room.

### 4. BIODEGRADATION
The dry mist naturally degrades without leaving any residue and without corroding surfaces (including electronic and mechanical ones). No need to wipe or ventilate.
