

ROTARY TUB FILLER

Constructed using stainless steel, this solution boasts durability, hygiene, and resistance to corrosion, making it ideal for handling food products.

The eight stations in the rotary tub filler serve different functions such as tub dispensing, product filling, lid placing, sealing.

The rotary design optimises the filling process, allowing for continuous operation and high throughput while minimising human intervention and maximising consistency and reliability.

FILL IT PACK IT WRAP IT

APPLICATIONS

Yoghurt

Soup

Dip

Ice Cream

Spreads

...AND MORE

ADJUSTABLE PRODUCT SIZE

The machine can be adjusted to accommodate multiple product sizes, up to 135mm in height and 127mm in diameter.
