

# → TW Grapples

[Click here to return to our full range of Grapple Products](#)

TW Grapples are designed for versatility with a four-tine upper half and a five-tine lower. This grapple has proven itself as a preferred method for handling waste, refuse and large volumes of loose materials.

- TW Grapples pin on in place of an excavator bucket, eliminating the need for additional hydraulics.
- The box-tine design and the use of high tensile, high alloy, abrasion resistant steel creates a lightweight, maximum strength tool.
- Available for all sized excavators.

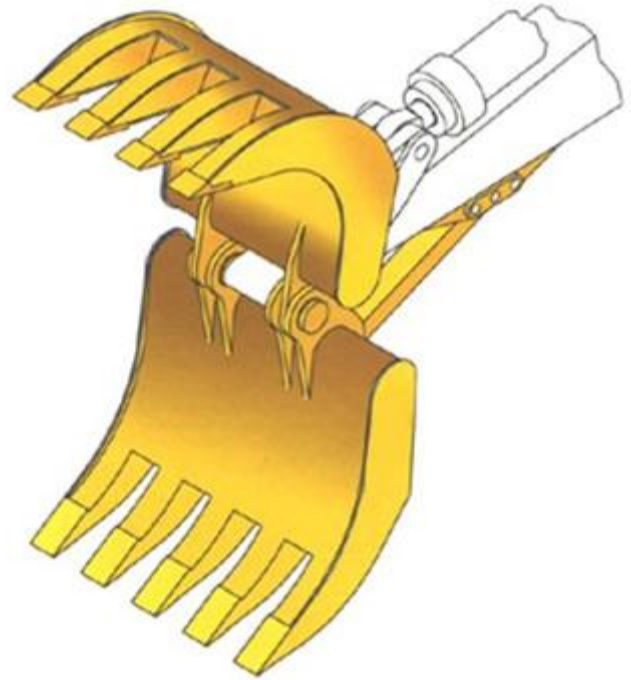

## Specifications

Excavator Attachment		Model	Weight Approx	Weight Approx	Opening	Width	Tynes
TW100	12 - 16 t	980 kg	2550 mm	1070 mm	4 & 5
