

CR8PT - PEDESTRIAN TURNSTILE

The Create Security Full Height Turnstile is designed and manufactured to provide a high level of perimeter security for the control of pedestrian movement. These turnstiles are ideally suited for restricting pedestrian access to one person at a time and are commonly installed for commercial and industrial applications which require increased security at unmanned access points.

The Create Security Full Height Turnstile can be integrated with an access control system to monitor and manage traffic flow and can be incorporated into an existing or new perimeter security system or installed as a standalone unit.

Qualifications and Credentials

Create Security holds all mandatory statutory licences and our quality and standards are supported by ISO accreditation and industry memberships.

Experience

With over 25 years experience in the physical security industry, Create Security systems are designed by industry experts and are supported by exceptional service and skilled workmanship.

Safety and Performance

Create Security systems are engineered with a focus on quality, safety and performance for a solution customers can rely on.

Service and Maintenance

Create Security offers highly reliable 24/7 breakdown service and support. Create Security can service and maintain all brands.
