1. KEY FUNCTIONS:

Touchpad-tapping*: 🖱 + 🖱 + F2 > Activates and deactivates the tapping function

Lighting levels: ☀ > ▪◻◻ > ▪▪◻ > ▪▪▪ > ▪▪▪ > OFF

Key lock: 🔒 > Press and hold for 2 seconds

2. SPECIAL FUNCTIONS:

Magnetic mounting:	Keyboard sticks to almost any magnetic surface up to an angle of 90° by means of a magnetic mounting.
Lighting:	Keyboard has 4 lighting stages that can be controlled via the ☀ key.
Clean mode:	To activate or deactivate the clean mode, hold this key 🔒 down for 2 seconds. This deactivates the key function and the touchpad. You can then clean the keyboard without triggering any incorrect commands.
*Touchpad-tapping:	Touchpad tapping allows you to use different functions by typing the touchpad surface once or several times (e.g. in word processing: single tap to position the cursor, double tap to select paragraphs)
