

Welcome to the Next Generation

AirVac
Part Number: AVU16540

Sludge, spoils and slurries don't stand a chance! From the makers of AirSpade, the next generation AirVac is the cost-effective, mobile alternative to large, expensive vacuum excavation trucks. Engineered to be rugged and dependable, AirVac vacuums up to 2 cubic ft/min of dirt, sand, gravel, and muck. Safely uncovers underground utility lines, tree roots, or other buried facilities. Ideal for trenching, potholing, and keyholing applications.

Designed to run off a standard, 185 cfm tow-behind air compressor, AirVac boasts a tank capacity of 11 cubic ft. (82 gallons) and an extra-wide dump door to facilitate emptying spoils for backfilling. With no motors or moving parts to wear out, the powerful, multi-stage venturi vacuum engine is also detachable to provide ease of transport. Washable exhaust filter bag captures dust and eliminates need for internal air filter. Rugged 15" pneumatic tires provide superior maneuverability on the job site. Featuring all aluminum construction with heavy-duty rear rails, loading the AirVac onto the bed of a pickup truck is an easy task.

AIRVAC FEATURES

Part Number	Item Description
AVU16540	AirVac 165 cfm with 4" Vacuum Hose
AV165EB	Replacement Exhaust Bag
AV165VA	Replacement Valve Assembly
AV165DG	Replacement Door Gasket
AV165EG	Replacement Engine Gasket
AV165LG	Replacement Lid Gasket
AVH4015LW	Replacement Lightweight Vacuum Hose
AVW4005	Replacement Vacuum Wand

Specifications	
Inlet	3/4" FNPT
Min. Compressor Required	185 cfm
Noise Level	99 dBA
Vacuum Flow	750 cfm
Vacuum Lift	262 in H ₂ O
Dimensions (L x W x H)	79" x 38" x 61.5"
Weight	218 lbs
