

BED MOVEMENT ALARM SENSOR

The Carewatch Bed Alarm and Sensor Pad System is simple and very effective. A battery-operated movement sensor, pressure pad, and alarm. The pad is placed on a bed (under the sheet) and the alarm sounds when the user stands from the bed. The sensor pad is waterproof.

KEY FEATURES

- Designed for senior citizens
- Bed monitor alarm protects patients from falls while alerting the caregiver that the patient needs assistance
- The alarm sounds immediately when pressure is released from the sensor pad, alerting caregivers to a potential fall. The alarm will reset automatically if the patient lies down, reminding to wait for a caregiver until assisted
- With alarm / off / music options
- With volume hi / low options
- With a LED light that flashes
- With an auto-reset button
- Works on one 9-volt battery (included)
- Easy and simple to use
- Standard sensor pad size: 20 x 30 inch

Applied
on all beds!
