Ultrasound

Lumify

Simplicity, quality, and flexibility

Philips Lumify

An app-based ultrasound system in a transducer.

Ready when you are.

An exciting breakthrough in **point-of-care** imaging technology.

Lumify is the app-based portable ultrasound system that delivers high quality imaging to compatible* smart device.

Bring the technology directly to your patients when it is needed, for faster diagnosis and treatment.

Our app-based ultrasound model makes it easy to get started. With three simple steps you are ready to go.

1

Download

the Lumify app to your compatible* smart device.

2

Connect

the Lumify transducer to your compatible* smart device.

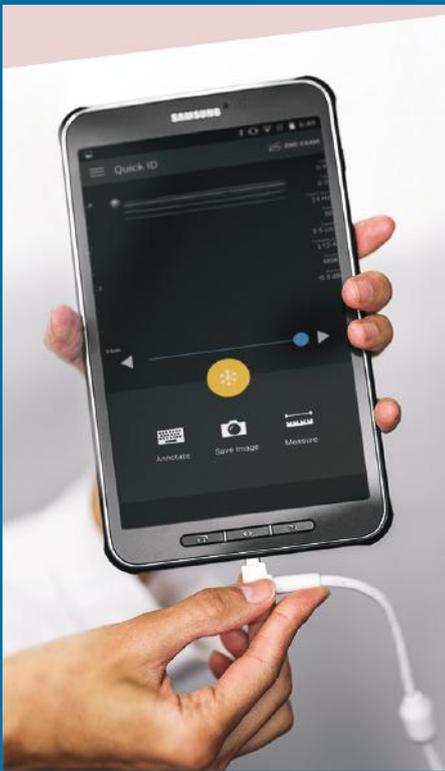

3

Scan

with high quality Philips imaging technology.

* View our Lumify portal for the list of compatible smart device options: <https://www.philips.com/lumify-compatible-devices>

Lumify brings three decades of **imaging expertise** and innovation to point-of-care practitioners.

Philips Lumify offers **simplicity**, **quality** and **flexibility** with three transducers:

- C5-2 broadband curved array
- L12-4 broadband linear array
- S4-1 broadband phased array

Philips Lumify gives you the power to quickly send and share images, notes and diagnostic data via email, DICOM to PACS, a shared network or a local directory.

Just plug the transducer into the USB port of the compatible* smart device and you are ready to begin scanning.

Our transducers and mobile app incorporate decades of expertise and innovation in ultrasound imaging to help you make informed decisions.

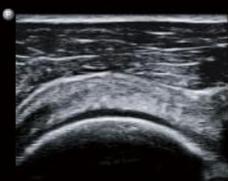

Lumify C5-2 broadband curved array transducer

Lumify L12-4 broadband linear array transducer

Lumify S4-1 broadband phased array transducer

Rotator cuff/shoulder

Carotid

Gallbladder

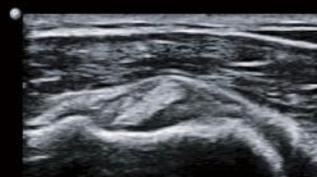

Inferior vena cava

Carotid artery and jugular vein

Kidney cyst

Biceps tendon

Left ventricle short-axis

Lumify combines all the advantages of Philips innovation to bring you a truly mobile ultrasound capability.

With Lumify, high-quality portable ultrasound is available almost anywhere.

Simple connectivity

Lumify makes it easy to share information and collaborate with colleagues and specialists.

Philips Lumify mobile ultrasound gives you the power to quickly send and share images, notes, and diagnostic data via email, DICOM to PACS, a shared network, or a local directory. It is a dependable and comprehensive point-of-care solution that brings simplicity, mobility, and flexibility to ultrasound technology.

Quality imaging

Our S4-1, L12-4, and C5-2 transducers deliver high image quality and reliable performance.

High-quality ultrasound imaging is now available on your compatible* smart device with Lumify, the mobile app and hardware solution from Philips. Lumify's transducer, the S4-1, has presets for cardiac, abdominal with lung, Ob/Gyn, and FAST exams. Our L12-4 transducer supports a variety of clinical applications, including soft tissue, musculoskeletal, lung, and vascular scanning. The C5-2 offers abdominal with lung and gallbladder presets, and Ob/Gyn capabilities.

Flexible accessibility

Available transducers support a variety of clinical applications thus increasing access to care.

Put the quality, flexibility, and mobility of Philips Lumify into more hands because Lumify works on compatible* Android mobile devices. When you purchase Lumify you will receive:

- A Philips Lumify transducer
- Lumify ultrasound app
- Ongoing software upgrades
- Manufacturer's warranty on the hardware
