

DISPOSABLE RESPIRATORS

More Air. More Wear™

Breathing is now a breeze™

MOLDEX[®]
Ideas that wear well.

BREATHES EASIER THAN A VALVED RESPIRATOR

More Surface, More Comfort.

Easier breathing and cool comfort are what you get when you wear an AirWave® respirator. The larger surface area of the patent-pending wave design means more air flows in and out of the mask – all without a valve! Easy breathing...by design.

More Flex, More Durability.

The unique FlexFit® design moves with your mouth for comfort all day long. More comfort means AirWave is a mask that your workers will want to wear, and that means more compliance. Plus the Dura-Mesh® shell prevents collapsing from heat and humidity so your mask lasts longer.

More Air. More Wear.™

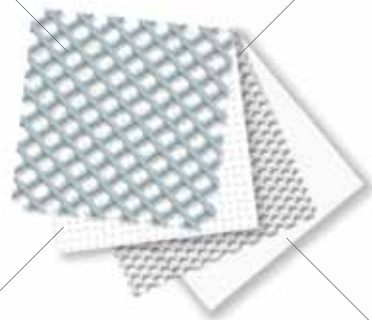

When you can breath easier and you're more comfortable, you'll want to keep wearing AirWave! Longer wear means less masks, less masks means more savings. Compliance and cost savings just got easier. Plus it's also metal free.

Outer Dura-Mesh® keeps respirator clean looking.

Inner Dura-Mesh® prevents collapsing from heat and humidity.

Filter is protected on both sides by Dura-Mesh®

Softspun® lining is comfortable against the face.

New Exclusive SmartStrap®

It just keeps on getting better...the new SmartStrap allows the AirWave to hang from the neck when not in use. So it does not get thrown away and you use fewer masks. Plus its adjustable soft cloth strap feels cool and comfortable. Say goodbye to waste, hello to cost-savings!

Adjustable

Hangable

Pinch free nose bridge

Soft foam nose cushion and contour shaped for comfort

FlexFit® comfort waves flex with you

Unique waves double the filter area for easy breathing

Cool inside – without a valve

Metal Free for applications such as Utilities, Mining, Food Processing and when metal may be hazardous
