1200w High Power Handpiece

High power and short pulse duration improves both comfort levels and efficacy. A fast, comfortable and effective treatment is guaranteed.

US Imported Laser Bars

The extremely high quality US manufactured laser bars allow for 20,000 hours of continuous laser usage & 100 million shots are guaranteed.

Intelligent Operating System

The operator only needs to select the area and skin colour to be treated and the system will automatically generate the recommended treatment parameters. Even an inexperienced operator can easily grasp the operation of the machine.

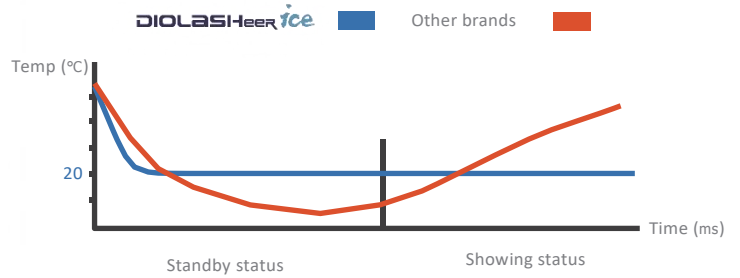

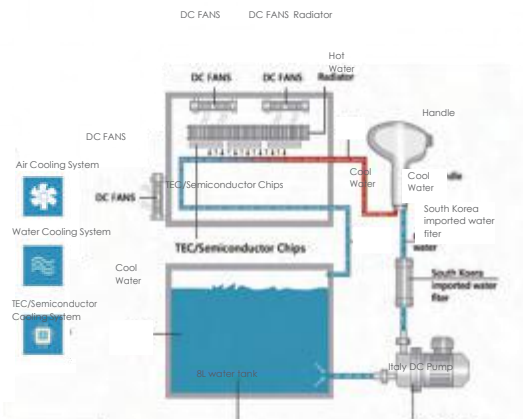

All Skin Color Treatments

Suitable for all skin tones - comfortable treatments - completely painless

Thermostatic intelligent refrigeration system

The instrument is internally loaded with a TEC refrigeration system and an intelligent temperature monitoring sensor to ensure that the operating temperature of the machine is constant at 20 degrees Celsius. Ensures that the water temperature remains the same for 24 hours of continuous operation.

Double Filters

PP Filter

The first stage adopts PP cotton to filter out impurities and prevents laser blockages.

PP filter
Ion filter

Metal Ion

The second stage uses a

Double Protection

Ion Filter

special Ion filter to filter out metal ions, avoiding inner laser corrosion and prolonging system life.
