Optional Anvil Holders and Tooling

Optional anvil holders and tooling can be easily installed on all new and existing PEMSERTER® Series 4® presses.

Top Mount Reverse Flange Anvil Holder includes punch and anvil.

Bottom Mount Reverse Flange Anvil Holder.

When a workpiece flange and fastener location prohibits the use of standard tooling, the use of top or bottom mount, reverse flange anvil holders will often solve the installation problem.

The PEMSERTER® QX4™ manual Turret Tool System provides an efficient method to quickly change between four different anvil tools. The one-handed operation of this tool allows an operator to install four different types and/or sizes of fasteners with one set-up (fastener dependent).
