FEATURES AND BENEFITS

HMPS5000 WRAPAROUND CASE PACKERS

HMPS5000 series fully automatic case packers eliminate end of line labour constraints. Packing various products in wrap-a-round, end-load, sleeve or tray style cartons. The system erects, loads and seals cartons within one compact fully integrated machine. All frames and major internal components are manufactured in stainless steel ensuring a long, low maintenance life.

GRAPHICAL OPERATOR PANEL

The packer's operation, size changes and diagnostic information is controlled via the graphical operator touch screen.

LARGE CAPACITY CARTON MAGAZINE

The large capacity carton magazine with its low loading height enables the machine to operate for long periods of time without operator attention.

AUTOMATIC ADJUSTMENT

The option of automatic adjustment between product changeovers, reduces the need for skilled operators and line down time. All automatic change over functions are integrated through the graphical operator panel.

Shelf Ready

HMPS can assist in meeting your clients shelf ready and one touch packaging requirements.

Benefits

- Lower material costs
- Compact footprint
- Speeds upto 35cpm
- Servo controls
- Adaptable to future product changes
- Optimal shelf ready solution
