

EVE! Lift

Accessible Baths & Equipment

The one-of-a-kind, modern EVE! shower and bath lift is just the right tool, depending on the mobility of your resident, to be able to safely and comfortably shower or bathe. The EVE! Lift is a highly manoeuvrable and easy-to-move lift that is versatile and can be used in any existing bathtub.

The battery-powered electric motor makes for an infinitely variable and quiet height adjustment that will not agitate the resident. With the associated resident handheld remote control, the lift can be operated simply and safely by one staff member. An integrated service module reports technical problems with the lift as well as necessary maintenance.

Features

- Made entirely of aluminium and stainless steel
- 100% functional as a shower chair
- Simple operation by only one staff member
- Fits any modern bathtub care
- Unrestricted transfer from the NORA sit-to-stand lift to the seat lifter
- The carrier frame is formed in a way that allows the resident to sit down on the seat without hindering the legs and heels
- Ergonomically designed safety steering handles ensure accurate manoeuvring
- Low height of only 49.5 cm entry
- Closed, easy-to-manoeuve double castors
- Handheld control unit with visual indication of battery level
