

Wheelie Bin Rubbish Compactor

1. How to use:

Instruction 2: The item will arrive flat for transport: Please adjust pin to in use mode as pictured here

The Manual Wheelie bin compactor is a portable unit that is a perfect option to make more room in your bin, saving the bin to over flow.

The compactor is made from quality heavy duty steel so it can handle vigorous use.

Great for the environment by reducing the incidence of waste falling out of the bin.

Simple use of a lever reduces the risk of physical injury.

Safe alternative to climbing inside the wheelie bin.

Suitable for 120 & 240L Bins.

Easy to use and store.

Specifications:

Model # MTC-WB24

Size L920xW350xH380mm

Pressing surface L340xW380

Weight 5.5kg

Colour Grey

Material Steel

How does it work?

1. Open the wheelie bin.
2. Set compactor pin from transport position to in use mode. Item will arrive flat for transport: Please adjust pin to in use mode
3. Hook the compactor over the bin handle.
4. Place the compactor plate in the centre of the waste.
5. Pull down with both hands.
6. Store compactor by hanging on the rear of the closed rubbish bin.

Please note: the Wheelie Bin in the pictures is not included, the pictures are to illustrate the use of the rubbish compactor.
