RELOCATABLE WEIGHBRIDGE

The Game-changer and the perfect introductory investment for your business.

**THE ANMAR
MINIBRIDGE**

From a fully automated system designed to capture all axle group weights controlled by LED traffic lights with a printed docket to a basic manual weight read out system. Similarly, we meet all your Chain of Responsibility requirements, whilst **maximising** payloads and **minimising** the risk of overloading.

It's fully portable, yet offers the same **locally designed & built quality, software options** and **fixed price solutions** as it's bigger, trade approved, brother.

RELOCATABLE BENEFITS

1. Confidence through your own onsite weighbridge meeting any Chain Of Responsibility requirements
2. Fully modular & relocatable, with the bridge deck only being 180mm high
3. Anmar Scales promote, sell & install these weighbridges because they are designed & manufactured here in Australia to meet the harsh Australian conditions
4. In the unlikely event that an issue ever arises, we can work directly with the local manufacturer to rectify without hassle
5. Extended warranties & guarantees from both the manufacturer & Anmar Scales
6. Complementary Training for operators including inhouse ongoing maintenance of asset (depending on site location this can be done onsite or remotely)
7. The Anmar Scales Project Promise: There are 'no hidden extras' to be added after we commence your job - everything you need is included in the package!

Our key point of difference can be summed up in just 2 words - LOCAL. QUALITY.

Anmar Scales Weighbridges are designed & manufactured in Australia using superior grade Australian steel, meaning strength, durability & longevity - that is our promise.

Remember, prices charged for foreign manufactured weighbridges are not reduced to match the reduced quality....

WHAT IS INCLUDED IN YOUR WEIGHBRIDGE PACKAGE?

- ✓ The Anmar Scales relocatable weighbridge (Minibridge) kit of your choice, 4m modular system which can be expanded out to a full length bridge should you choose) and best of all, locally manufactured
- ✓ Genuine Rice Lake Stainless Steel Indicators (options taken will determine which model is used)
- ✓ Anyload 102MT Alloy Steel 25t double ended load cells (2 per pad)
- ✓ Large Anyload LED remote display/s with traffic lights , choose from either one at each end or simply one if the bridge is in one way operation
- ✓ All load cell & remote display cabling from bridge & remote display/s back to indicator (excluding 230V wiring) including weather resistant plugs
- ✓ Any civil drawings to suit weighbridge kit should you wish to have the recessed option
- ✓ Commissioning & Calibration prior to leaving Anmar Scales workshop with use of certified test masses
- ✓ Freight of bridge sections & all required components to site

OPTIONS

- ✓ 1.8m long heavy duty ramps
- ✓ Checker plate infill sections
- ✓ Remote control print buttons so you do not even need to leave the truck
- ✓ Highly advanced indicator & software options which can include remote access for both record keeping but also remote fault finding
- ✓ Choice of which ever color deck you desire

THE PROCESS

ABOUT ANMAR

We promise fast & on-time service & fixed prices with all our Aussie-made weighbridges.

Our vision is to see transparency, diversity & innovation in the weighing industry. Our fully licensed, qualified and OH & S compliant team is ready, now.

OUR MISSION

The decimation of the Australian manufacturing sector has taken a heavy toll on our nation & our people. Our goal is to supply, install, service & maintain Australian designed & manufactured weighbridges to help leading Australian businesses improve their productivity & profitability. We believe in & stand by our products because second-best is just not good enough. Our clients deserve the best; that is what Anmar deliver.

On behalf of the Anmar team, thanks for allowing us the opportunity to be a part of your story!
