(MP)² TECHNOLOGY

The VENUS Versa™ Pro is powered by (MP)² technology, a synergistic combination of Multi-Polar Radio Frequency (RF) and Pulsed Electro Magnetic Fields (PEMF).

(MP)² technology delivers fast, homogeneous heating to multiple tissue depths for exceptional clinical outcomes. PEMF, a non-thermal energy, promotes collagen synthesis and fibroblast proliferation.

*VENUS Versa™ Pro is indicated for the treatment of benign pigmented epidermal and cutaneous lesions, and the treatment of benign cutaneous vascular lesions. Treatment of benign pigmented epidermal and cutaneous lesions, including dyschromia, hyperpigmentation, melasma, ephelides (freckles), lentiginos, nevi, and cafe-au-lait macules. Treatment of benign cutaneous vascular lesions, including port wine stains, hemangiomas, facial, truncal, and leg telangiectasias, rosacea, erythema of rosacea, angiomas and spider angiomas, poikiloderma of Civatte, leg veins and venous malformations.

**Temporary body contouring via skin tightening, circumferential reduction, and cellulite reduction are approved indications outside of the U.S. In the U.S., VENUS Versa™ Pro is cleared for the treatment of moderate to severe facial wrinkles and rhytides in females with Fitzpatrick skin types I-IV.

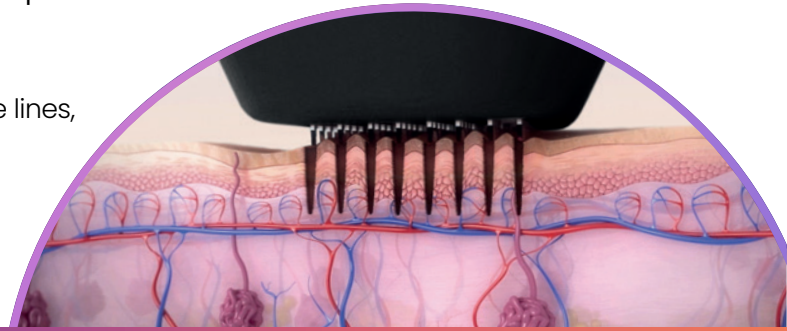

NANOFRACTIONAL RF™ WITH SMARTSCAN™

The NANOFRACTIONAL RF™ is a highly customizable skin resurfacing technology treating a wide range of skin conditions requiring ablation and resurfacing. SmartScan™ technology, with personalized pattern selection enhances treatment control, and minimizes discomfort, ensuring a safer treatment with lower downtime.

2 ENERGY DELIVERY OPTIONS

Designed to resurface the skin to address a wide range of patient concerns. Empowers treatment customization with two tip options:

- **160 PIN TIP** for milder skin texture irregularities such as fine lines, dyschromia, and enlarged pores
- **80 PIN TIP** for more severe skin concerns such as acne scars/other scars, striae, and deep wrinkles
