

**14 Can Aerosol Storage Cage
EW-AS14**

Any aerosol cage from our Australian made range is constructed from heavy duty, powder-coated steel and is robust and easy to manoeuvre. The aerosol cages feature high open area perforations which deliver natural ventilation in accordance with Australian Standards and all appropriate warning and safety signage is included. Aerosol cans are widely used for delivering personal-care products, paints, lubricants, insect repellent, gardening and automotive goods to consumers.

Aerosol cans are pressurized containers and classified as Dangerous Goods under Class 2. All aerosol cans present a significant hazard in workplaces and in society because of the compressed gas used as a propellant.
