General Examination Camera HD

Capturing clear and precise high-quality medical images has never been easier on this handheld device

The Visionflex GEIS® General Examination Camera is a USB connected handheld device that can capture medical grade quality images and video in full HD 1080p resolution at the touch of a button.

This easy-to-use medical imaging camera allows its operator to perform a wide range of examinations, including dermatology, oral examinations, and wound assessments.

Clear, precise, high-quality images.

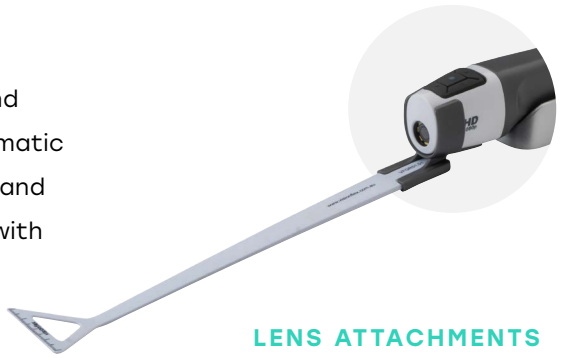

GEIS®

General Examination Camera HD

Capturing clear and precise high-quality medical images has never been easier on this handheld device

With its lightweight, ergonomic design and 5 control buttons, the GEIS® offers automatic or manual focus modes to capture clear and crisp visuals every time, LED illumination with 4 brightness levels and single button image capture all in one small, single-hand operated camera.

The GEIS® General Examination Camera can connect to a PC, Mac or Visionflex ProEX device via USB making it perfect for a wide range of applications where clear, precise, and high-quality images are essential.

LENS ATTACHMENTS

Dermatology hood for clear, close-up images of the skin and eyes with consistent lighting
