## Open Up Bins 90lt

The ergonomic pedal mechanism allows for a hands-free, hygienic experience, eliminating the need for hand contact and making it an ideal solution for environments where sanitation is key.

Designed with durable, shock-resistant plastic, the lid-lifting bar offers robustness that ensures longevity and sustained performance over time.

The bin's design features functional compartments for various types of waste, promoting efficient disposal and recycling, contributing to a cleaner, greener world.

Available in various colours, the bin's lids enable the creation of visually intuitive waste collection zones, making waste segregation and effective recycling easier than ever.

Crafted from high-grade polypropylene, known for its durability and resistance to chemical erosion, the bin promises longevity even in demanding conditions.

OPEN-UP BIN 90 LITRE W/ WHITE LID	TTS00005700

## Other Items available from DB Health

### BetterShield Full Face Shield

Improved thickness – moved from a 1.0mm thickness to a 1.2mm thickness - still light and flexible

The application of the antifog is part of the material of the shield – so the shields are VERY clear, and fog much less!

Moved from glue tabs for the elastic, to stapled elastic for reinforced strength

Meets the following international standards : EN 166:2001 & ANSI/ISEA Z87.1

Lastly, although the BetterShield has been sold as single use disposable, with all these improvements, we find the useful life of the BetterShield to be longer and reusable in some instances.

BETTERSCHILD DISPOSABLE FACE SHIELD (CTN/100)	MXFS01
