

IPEX Hand & Machine Film

IPEX film offers very high puncture resistance properties, particularly useful when wrapping items that have sharp edges or uneven loads.

Integrated Packaging's blown films are manufactured to achieve strong and safe pallet unitisation.

Features and Benefits:

- High tensile strength
- High load retention
- Single sided cling to reduce pallet to pallet stick

IPEX Gold Machine Film

IPEX Gold machine film combines the best properties of blown and cast film in the one product.

Using only the highest quality resins combined with specialist manufacturing techniques enables a thinner film to be produced that retains and improves major strength properties of conventional film.

Features and Benefits:

- Designed for fully automated machines
- Ideal for high volume throughput
- Achieves a lower cost per pallet wrapped
- High strength, gloss & clarity

Overview of Integrated Packaging

Since our establishment in 1982, Integrated Packaging has grown to become the largest manufacturer of stretch film in Australasia with manufacturing in Auckland, Melbourne, Sydney and Perth.

As a market leader, Integrated Packaging offer a wide range of innovative products that provide our clients cost effective solutions.

Features and Benefits of Blown Film:

- Manufactured in monolayer and three layer construction
- Superior load holding capability to cast film
- Very high puncture and tear resistance

Engineered Packaging Solutions

Maxi Pre-Stretch Hand Film Range

Maxi Wrap is Integrated Packaging's premium pre-stretch hand film and has virtually no neck down. Maxi Wrap reduces the amount of film a operator is required to use to wrap a pallet and increases the amount of pallets wrapped per roll providing a lower cost per pallet wrapped while achieving the optimum performance level and holding power.

Features and Benefits:

- Increased puncture and tear resistance
- High load retention properties
- Reduces waste by 30 - 40%
- Reduces cost per pallet lighter and easier to use

Excell Hand/Machine Film

Ex-Cell is a blown pre-stretch film and as such requires less operator effort to apply and uses less film per pallet.

Features and Benefits:

- Highest puncture and tear resistance
- High load retention properties
- Reduces cost per pallet
- Operator friendly/lighter and easier to use
- Operator can apply walking forward

Cast Hand/Machine Film

Integrated Packaging's **Cast film** range is manufactured to achieve strong and safe pallet unitisation and is excellent for many wrapping applications.

Features and Benefits:

- High tensile strength
- High tack
- Excellent scanning clarity
- Low noise levels

Top Sheets

Integrated Packaging **Top Sheets** act as a moisture and dust barrier for the top or bottom of the pallet and provide secure protection from the elements.

Features and Benefits:

- Cost effective
- Wide range to suit most pallet sizes
- Perforated rolls for simple tear off or a continuous sheet for automated lines
- Easy application
- In clear or black plastic

Bundle Shrink Films

High quality resins combine to make a shrink film that creates tight packs with strong load holding to ensure that your products reach the shelf in the best possible condition at a low cost per pack.

Features and Benefits:

- Available in industrial grade or high gloss for extra shelf appeal
- Less plastics in waste stream
- Speeds up the wrap process

PVC Foods Films

Integrated Packaging's range of **PVC film** solutions offer superior presentation and maximum shelf life of your meat, seafood, poultry, dairy, bakery and produce products that is very user friendly and safe to use.

Shelf life of your product is increased through an innovative film structure which controls oxygen transmission.

Integrated Packaging can manufacture PVC film to your requirements.

Features and Benefits:

- High cling, stretch and clarity to enable precision wrapping
- Suitable for portion pack wrapping
- Suitable for use with fresh, frozen, chilled or warm products
- Available in wide range of widths, gauges and roll lengths with the option of trimmed edges to suit your specific application
- Product applications for manual hand wrap, semi automated and fully automated wrapping operations
- Three main colours for easy identification

Wrapping Machines

Our state of the art wrapping equipment ranges from semi automatic machines to fully automated lines and individual projects.

Our service include design, engineering, installation and commissioning as well as ongoing maintenance and repair programmes.

Machine range:

- IM310
- IM315
- IM320
- IM330
