

## PRODUCT FEATURES OVERVIEW

### PERFORMANCE UP

- Dramatic TCO saving – Fuel efficiency increased by 12%, Lift performance improved by 34%
- Cooling performance improved by 10% – Reliability and durability of power train improved
- Engines from Mitsubishi and Nissan with confirmed capability, durability, and cost – effectiveness in the markets
- Transaxle with capability and durability applicable to heavy-duty operating environments
- Fully hydraulic steering system characterized by easy operation and agile, precise response

### SAFETY UP

- LED working lamp guaranteeing clear field of vision during operation indoors and at night
- Operator Position Sensing System (OPSS) – Limiting driving, lifting, and tilting **Option**
- Ensuring a wide rear field of view – Panorama, RH and LH side mirrors applied by default
- Fork safety feature – Maintaining safety in case of rupture of mast hydraulic line during operation
- Rear grip bar & horn guaranteeing convenience and safety of driving during backward movement **Option**

12% ↑      Max. 34% ↑      10% ↑

Fuel efficiency  
(Diesel model only)

Lifting performance  
(Diesel model only)

Cooling performance  
(Diesel model only)

ECONOMICAL PERFORMANCE

### CONVENIENCE UP

- Cockpit design by applying ergonomic design providing consistent comfort
- MCV lever with deck-mounted structure to minimize movement of the driver's arms
- Hood insulation reducing noise and heat introduced into the cockpit
- Grammer full-suspension deluxe seat including cushion-height adjustment function **Option**
- Standard tile cylinder cover for keeping the leg room clean, preventing the inflow of dust into the cockpit during cabin mounting
- Polyurethane floor mat reducing vibration and noise to the operator

### SERVICE UP

- Side cover and floor plate with tool-less structure to reduce operating hours
- Mission controller and filter mounted on top of transmission
- Plastic sub-bonnet configuration exclusive for radiator maintenance
- Fuse box in automobile style arranged on the front of the dashboard considering the frequent maintenance jobs
- Configuring the rear cover by default for preventing the inflow of foreign substances into the bottom of the engine radiator
- LPG balance alarm system by making use of the pressure difference inside the tank **Option**

ENVIRONMENT FRIENDLY  
GREAT PRODUCTIVITY, DURABILITY

# PERFORMANCE <sup>UP</sup>

Low fuel consumption  
as well as high durability!

Try excellent cost-effectiveness  
unique to **35DE/LE-7**

## 35DE/LE-7

### Transaxle with high durability and environmental adaptability

High capacity clutch pack and torque converter with high torque conversion efficiency is applied to the transmission of power shift mode of single gears forward and backward to perform successfully the heavy-duty operation with push mode and driving on poor roads. Axle applied with technologies of TCM demonstrates high durability and braking power and employs shoe brake with low maintenance cost.

### TCO saving - Higher fuel efficiency

Applying engine in a size sufficient for flexible operation in case of variation of loads with top power and displacement among the same class and optimized design for mast operation speed improves the fuel efficiency of the diesel-engine forklift truck up to 10%; thus dramatically improving TCO.

Fuel efficiency  
(Diesel model only)

12%

### Heat dissipation capability - Improved power train reliability

The heat dissipation capability of transmission is improved by 10% by applying aluminum radiator with high durability and heat dissipation capability, and the cooling fan consists of seven blades that yield the effects of reducing engine noise and increasing air-blowing mass.

Cooling performance  
(Diesel model only)

10%

### Optimized mast operation speed

Mast operation capability is significantly improved compared to competing models by combining the load sensing function of optimized priority valve and the highest torque of engine among competing models, with design features such as low and stable center of gravity of the body.

Lifting  
Load

34%

At Loaded

### Fully hydraulic power steering

Fully hydraulic power steering without mechanical linkage between steering wheel and steering cylinder and boosting of operability of the wheel by the hydraulic pump reduce the work fatigue of the operator with easy steering operation and agile, secure response.

### Engine qualified in terms of reliability and cost-effectiveness in the markets

S4S Engine & GK25 Engine are the main stream engines chosen by a number of forklift truck makers leading the forklift truck markets and are products qualified in terms of reliability and cost-effectiveness as well as serviceability.

① S4S Diesel Engine : EU emission Stage 3A, Turkey emission Regulation R96 have been satisfied.

② GK25 LPG Engine : Low fuel consumption, less noise and vibration and installer IMPCO LPG fuel system.

\* Bi-Fuel (Gasoline/LPG) **Option**

	S4S Diesel Engine	GK25 LPG Engine
Engine Power (kw/rpm)	35.3/2,250	35.0/2,550
Max Torque (kg·m/rpm)	18.0/1,700	1.7/1,600
Displacement (cc)	3,331	2,488

ENHANCED SAFETY

**SAFETY & CONVENIENCE** UP

**Utmost importance of safety and convenient operation**

Diverse incident prevention functions and consistent convenience are provided

**COCKPIT, A SPACE WHERE OPERATION EFFICIENCY IS ENSURED**

As a very important space for ensuring operation convenience and safety, the cockpit is equipped with ergonomic features such as ① cluster with wide visibility, position-adjustable steering wheel and seat, deck-mounted MCV lever, prompt and responsive pedal, and wide working visibility.

**Deck Mount MCV lever**

The deck-mounted MCV lever has a feature that reduces movements of the arms of the operator compared to the dashboard-mounted type. In addition, the levers are arranged in the radial direction around the elbow to improve convenience of operation further.

**Hood insulation & floor mat**

The insulation inside the hood reduces heat and noise from the engine to the cockpit. Furthermore, the polyurethane-foam floor mat reduces vibration and noise from the truck body to provide a pleasant operating environment.

**Safety – Lamp & Mirror**

LED work lamp and turn signals are installed by default to ensure brighter field of vision and guidance of movement direction of forklift truck during operation in dark indoor space and at night. Panorama and RH and LH side mirrors are mounted by default to secure rear field of vision of operation.

\* Beacon lamp is optional.

**Operator presence sensing system** Option

The OPSS restricts driving, lifting, and tilting in when the operator leaves the driver's seat in order to prevent safety accidents.

**Fork safety features**

As the forks are being lowered, a down-control valve maintains a controlled descent speed. The down-safety valve prevents forks from dropping down in case of sudden damage of hydraulic line.

**Rear Grip Bar & Horn** Option

The rear steering wheel with horn embedded allows the driver to keep a stable, convenient posture during rear driving and operate the horn rapidly without changing the driving posture in case of an emergency situation.

**Grammer Seat** Option

The full suspension seat of Grammer of Germany has an adjustable cushion depending on the weight of the driver, and convenience specifications such as seat belt switch, arm rests, and heater are optional.

\* Semi-suspension seat is applied by default.

**Various electric interlocks**

**Parking electric interlock**

Operation of forklift truck is limited when applying the parking brake to prevent safety accidents that may take place due to the unintended operation of forward/backward levers by the operator.

**Engine Starting at Neutral Position**

The engine will start only with the forward and reverse levers kept at neutral positions to prevent safety accidents that may take place when starting the engine with such levers kept at forward or reverse positions.

# MAINTENANCE <sup>UP</sup>

**Easy maintenance, cost-effective service**

Stay satisfied even after completing your work

## LAGER MAINTENANCE SPACE

A large work space is provided for the follow-up management of consumables and major functional parts when you remove the engine compartment cover supported with two gas springs tool-less type side cover and floor plate.

## Transmission maintenance

As the major functional parts of transmission, the control valve and filter are mounted on top of transmission to reduce the maintenance hours. Transmission is accessible when removing the engine hood and floor plate of tool-less type.

## Detachable radiator cover

The plastic tool-less radiator sub-hood on top of the counterweight separated from the main hood reduces the downtime for checking the cooling water level and makeup.

## Snorkel type air intake & Dual element

Snorkel-type air intake structure and large-capacity air cleaner measuring 6" are applied to keep the inflow of dusts from the ground into the air cleaner during operation, thereby extending the maintenance interval of the air cleaner.

## Brake oil reservoir

Oil reservoir is mounted on top of the dashboard for the convenient management of brake oil, which should be frequently inspected and made up for safe operation.

## Centralized fuse holders

Fuse is an item demanding the most frequent maintenance works among the components of the electric system of the forklift truck. All of the fuses are centralized on the front of the dashboard for convenient inspection and replacement of fuses.
